

FISCAL PROFILES 1995

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

AUGUST 1995

COMMISSION REPORT 95-11

Summary

This report contains statistical information about California higher education from the 1965-66 fiscal year through 1995-96 year, along with related information on State financing in general and public elementary and secondary education in particular. The fifth in a series, it follows the format of the Commission's October 1994 Fiscal Profiles. The Commission compiles, disseminates and analyzes this information to provide policy makers with comprehensive and comparable financial data that can be used in comparative analysis of higher education finance issues. Secondly, this document provides an efficient and accurate response to the many questions on this subject that the Commission receives each year.

New is a display showing the "State Appropriations Limit" (the Gann Limit) and funding for California public elementary and secondary education, and the California Community Colleges provided under "Proposition 98." In addition, this report contains substantially updated information on appropriations for instruction-related activities, by major fund source, per funded full-time-equivalent student in the California Community Colleges, the California State University, and the University of California. The biggest change to this year's edition is the inclusion of 11 displays of information on independent colleges and universities in California, compiled by the Association for Independent California Colleges and Universities (AICCU).

Among the highlights of the information in this report: the State's funding commitment to public postsecondary education, relative to other "caseload-driven" expenditures such as Corrections, continues to wane, increases in resident student fees in the University of California and the California State University systems continue to outpace growth in State and national inflation indices, the proportion of the California State University and the University of California's respective budgets which comes from the State General Fund has declined significantly, while the proportion of funds at each system which is derived from student fees has risen significantly, and California's combined (state, federal and local) per-capita expenditures for higher education are higher than those at any of the seven most populous states in the country.

The report shows that, preliminarily, California higher education fares better in the recently passed 1995-96 budget than at any other time this decade. The budget also implements a policy decision not to increase resident undergraduate and graduate student fees. However, public-sector enrollment growth is not fully funded in the budget and there are still great unmet needs in the area of student financial aid. If State economic assumptions are accurate, the subsequent increase in State revenues may soon give California the opportunity to rebuild its higher education enterprise.

The Fiscal Policy and Analysis Committee of the Commission discussed this report at its meeting on August 28, 1995. Additional copies of the document may be obtained from the Commission at 1303 J Street, Suite 500, Sacramento, California 95814-2938. Questions about the substance of the report may be directed to Kevin G. Woolfork of the Commission, at (916) 322-8007.

Funding per Unit of Full-Time-Equivalent Student Enrollment

- 7 University of California State General Funds and Combined State General Fund and Systemwide Student Fee (SSF) Revenues Per Full-Time-Equivalent Student (FTES), for Fiscal Years 1965-66 Through 1995-96
- 8 California State University State General Funds and Combined General Fund and Systemwide Student Fee (SSF) Revenues Per Full-Time-Equivalent Student (FTES), for Fiscal Years 1965-66 Through 1995-96
- 9 California Community Colleges State General Funds and Combined General Fund, Local Revenues, and State Enrollment Fee Revenues Per Full-Time-Equivalent Student (FTES), for Fiscal Years 1965-66 Through 1995-96
- 10 Average Revenues Per FTE Student for Instruction-Related Activities (I-R) in California Public Postsecondary Education and "I-R" Expenditures for Selected AICCU Institutions, for Fiscal Year 1980-81 Through 1994-95

Appropriations of Funds for California Higher Education

- 11 State General Fund Appropriations for Current Operations of California's Three Public Systems of Higher Education, Including Local Revenues for the Community Colleges, for Fiscal Years 1965-66 Through 1995-96
- 12 Annual Percent Changes in State General Funds, and Local Revenues for California's Three Public Postsecondary Education Systems, for Fiscal Years 1966-67 Through 1995-96
- 13 University of California Fund Sources for Current Operations for Fiscal Years 1969-70 Through 1995-96
- 14 University of California Fund Sources for current Operations as a Percentage of Total Funds, with Annual Percent Changes in Total Funds, for Fiscal Years 1969-70 Through 1995-96
- 15 University of California Fund Sources for Organized Research, Except for Department of Energy Laboratories, and Annual Percent Changes, for Fiscal Years 1965-66 Through 1993-94
- 16 California State University Fund Sources for Current Operations for Fiscal Years 1967-68 Through 1995-96
- 17 California State University Fund Sources for Current Operations as a Percentage of Total Funds, with Annual Percent Changes in Total Funds, for Fiscal Years 1967-68 Through 1995-96
- 18 California Community Colleges Fund Sources for Current Operations for Fiscal Years 1965-66 Through 1995-96
- 19 California Community Colleges Fund Sources for Current Operations as a Percent of Total Funds, with Annual Percent Changes in Total Funds, for Fiscal Years 1965-66 Through 1995-96

- 20 | Annual Percent Changes in Major Sources of Current Operations Funds for California's Three Public Systems of Postsecondary Education, for Fiscal Years 1966-67 Through 1995-96

Categories of Expenditure for the Systems

- 21 | University of California General Purpose Expenditures in Program Categories for Fiscal Years 1966-67 Through 1995-96
- 22 | University of California General Purpose Expenditures in Program Categories as a Percentage of Total Expenditures, with Percent Changes in Totals for Fiscal Years 1966-67 Through 1995-96
- 23 | California State University General Purpose Fund Expenditures in Six Program Categories for Fiscal Years 1967-68 Through 1995-96
- 24 | California State University Expenditure in Program Categories as a Percentage of Total Expenditures, with Percent Changes in Expenditure Totals, for Fiscal Years 1967-68 Through 1995-96
- 25 | California Community Colleges' State Operations and Local Assistance Funding by Expenditure Category, with Annual Percent Changes in Total Expenditures and Proportions for Each Category, for Fiscal Years 1967-68 Through 1995-96

Student Tuition and Fee Charges and Revenues

- 26 | Systemwide Resident Student Fee Revenues from California's Three Public Higher Education Systems, for Fiscal Years 1965-66 Through 1995-96
- 27 | Revenues from Nonresident Tuition and Total Student Fee Charges at California's Three Public Higher Education Systems, for Fiscal Years 1965-66 Through 1995-96
- 28 | Annual Undergraduate Resident Student Fees and Nonresident Tuition of California's Three Public Higher Education Systems for Fiscal Years 1965-66 Through 1995-96
- 29 | Systemwide and Total Annual Resident Undergraduate Student Fee Charges at California's Three Public Higher Education Systems with Percent Changes, for Fiscal Years 1965-66 Through 1995-96, in Actual Dollars
- 30 | Percent Changes in Student Fees (Systemwide and Total) at California's Three Public Higher Education Systems, and in Selected Price Indices and California Personal Income for Fiscal Years 1965-66 Through 1995-96
- 31 | Systemwide and Total Resident Undergraduate Student Fee Levels, in Actual and 1994-95 "Constant Dollars" at California's Three Public Higher Education Systems, for Fiscal Years 1965-66 Through 1995-96

State Financial Aid

- 32 | Cal Grant A, B, and C Student Financial Aid Program Total Funding and Annual Percent Changes by Source for Fiscal Years 1968-69 Through 1995-96

- 33 Number of New and Renewal Cal Grants A, B, and C Awarded, for Fiscal Years 1968-69 Through 1995-96, with Annual Change in the Total Number of Awards
- 34 Maximum Dollar Amount of Each Grant Award for the Cal Grant A, B, and C Student Financial Aid Programs, for Fiscal Years 1968-69 Through 1995-96
- 35 Annual Changes in Numbers of Authorized New Cal Grant A, B, and C Awards and Annual Percent Changes in Maximum Grant Award Amounts, for Fiscal Years 1968-69 Through 1995-96

Capital Outlay Funds

- 36 University of California Sources of Funds for Capital Outlay and Total Annual Percent Changes, for Fiscal Years 1965-66 Through 1995-96
- 37 University of California Sources of Funds for Capital Outlay as a Percentage of Total Capital Outlay Funds, for Fiscal Years 1965-66 Through 1995-96
- 38 California State University Sources of Funds for Capital Outlay and Total Annual Percent Change, for Fiscal Years 1965-66 Through 1995-96
- 39 California State University Sources of Funds for Capital Outlay as a Percentage of Its Total Capital Outlay Fund for Fiscal Years 1965-66 Through 1995-96
- 40 California Community Colleges' Sources of Funds for Capital Outlay and Total Annual Percent Change for Fiscal Years 1965-66 Through 1995-96
- 41 California Community Colleges' Sources of Funds for Capital Outlay as a Percentage of Their Total Capital Outlay Funds for Fiscal Years 1965-66 Through 1995-96

Independent Institutions in California and the Nation

- 42 Number of Grants/Fellowships and Amounts Awarded to California Independent Colleges and Universities, for Fiscal Years 1976-77 Through 1994-95
- 43 Relative Value of Cal Grant Maximum Awards in Relation to Independent College Tuition and Fees, for Fiscal Years 1980-81 Through 1994-95
- 44 Current Fund Revenues in California Independent Colleges and Universities, for Fiscal Years 1979-80 Through 1993-94
- 45 Current Fund Revenues in California Independent Colleges and Universities, For Fiscal Years 1979-80 Through 1993-94
- 46 Enrollments, Tuition Revenues, and Weighted Average Tuition in California Independent College and Universities for Fiscal Years 1970-71 Through 1994-95
- 47 Education and General Expenditures (E&G) in California Independent College and Universities for Fiscal Years 1979-80 Through 1993-94

- 48 Education and General (E&G) Expenditures in California Independent College and Universities, in Percentages, for Fiscal Years 1979-80 Through 1993-94
- 49 Instruction-Related Expenditures in California Independent College and Universities, for Fiscal Years 1979-80 Through 1993-94
- 50 State Appropriations to Independent Colleges and Universities in 34 States, for Fiscal Years 1984-85 Through 1993-94
- 51 Annual Percent Change in State Appropriations to Independent Colleges and Universities in 34 States, for Fiscal Years 1984-85 Through 1993-94
- 52 Undergraduate, Graduate, and Professional Headcount and FTE Enrollment in the Independent Colleges and Universities in 28 States, for Academic Year 1993-94

Enrollments in California Public Postsecondary Education

- 53 Total Enrollment for California's Three Public Systems of Higher Education, Headcount and Full-Time-Equivalent Student (FTES) Enrollment, for Fiscal Years 1965-66 Through 1995-96
- 54 Annual Percent Changes in Headcount and Full-Time-Equivalent-Student (FTES) Enrollment in California's Three Public Systems of Postsecondary Education for Fiscal Years 1966-67 Through 1995-96
- 55 University of California Full-Time-Equivalent-Student (FTES) Enrollment by Student Level, for Fiscal Years 1965-66 Through 1995-96, with Percent Changes in Non-Health Sciences and Total Enrollment
- 56 California State University Full-Time Equivalent Student (FTES) Enrollment by Level and California Community College FTES Enrollment by Funding Source or Status, for Fiscal Years 1965-66 Through 1995-96

Price (Inflation) Indices, Income Growth, and System Financial Support

- 57 Index Values and Calculations of Inflation Factors for 1995-96 "Constant Dollars," for Selected Price Indices and California Personal Income, for Fiscal Years 1965-66 Through 1995-96
- 58 Index Values and Annual Percent Change in Selected National and California Price Indices and California Personal Income, with Cumulative 30-Year Percent Change, for Fiscal Years 1965-66 Through 1995-96
- 59 Annual Percent Change in Selected Price Indices, University, State University, and Community College General Funds, Budgeted Faculty Salary Adjustments and Parity Calculations, and Total State General Funds for Fiscal Years 1965-66 Through 1995-96

Actual and Constant-Dollar State-Determined Funds

- 60 Annual Percentages of "State Determined Funds" by Source, for the University, the State University, and the Community Colleges, for Fiscal Years 1965-66 Through 1995-96
- 61 University of California Selected Sources of Funds for Current Operations in Actual and 1995-96 Constant Dollars for Fiscal Years 1968-69 Through 1995-96
- 62 University of California Revenues per Full-Time-Equivalent Student for Current Operations, from Selected Sources of Funds in Actual and 1995-96 Constant Dollars for Fiscal Years 1968-69 Through 1995-96
- 63 California State University Selected Sources of Funds for Current Operations in Actual and 1995-96 Constant Dollars for Fiscal Years 1968-69 Through 1995-96
- 64 California State University Revenues per Full-Time-Equivalent Student for Current Operations, from Selected Sources of Funds in Actual and 1995-96 Constant Dollars for Fiscal Years 1968-69 Through 1995-96
- 65 California Community Colleges Selected Sources of Funds for Current Operations in Actual and 1995-96 Constant Dollars for Fiscal Years 1968-69 Through 1995-96
- 66 California Community Colleges Revenues per Full-Time-Equivalent Student for Current Operations, from Selected Sources of Funds in Actual and 1995-96 Constant Dollars for Fiscal Years 1968-69 Through 1995-96

Hastings College of the Law and Public School Support

- 67 Funding and Enrollment for Hastings College of the Law, with Annual Percent Changes in Fund Totals, for Fiscal Years 1965-66 Through 1995-96
- 68 California Public K-12 Education Major Revenue Sources for State Operations and Local Assistance, for Fiscal Years 1965-66 Through 1995-96
- 69 California Public K-12 Education Annual Average Daily Attendance (ADA), Including Adult Education and Continuation Education Programs, for Fiscal Years 1965-66 Through 1995-96
- 70 California Public K-12 Education Combined State Aid Appropriations and Total State and Local Appropriations per Unit of Average Daily Attendance (ADA), for Fiscal Years 1965-66 Through 1995-96

Per-Capita Spending in California Public Education

- 71 Per-Capita State Appropriations and Total State and Local Appropriations to California K-12 Education, for Fiscal Years 1965-66 Through 1995-96
- 72 Per-Capita State Fund Appropriations and Combined State and Systemwide Student Fee Revenues of the University of California for Fiscal Years 1965-66 Through 1995-96

- 73 Per-Capita State Fund Appropriations and Combined State and Systemwide Student Fee Revenues of the California State University for Fiscal Years 1965-66 Through 1995-96
- 74 Per-Capita State Fund and Local Fund Appropriations and "Combined" State, Local, and Student Funds (S / L / S) for the California Community Colleges for Fiscal Years 1965-66 Through 1995-96
- 75 Per-Capita "Combined" Fund Appropriations for K-12 Education and California's Three Public Higher Education Systems, with System's Proportions of Total Per-Capita Appropriations, for Fiscal Years 1965-66 Through 1995-96

*Education Funding and Enrollments
in Comparison to State Funding and Population Growth*

- 76 Comparisons of Annual Percent Changes in "Caseload" Spending for Selected Entities -- With Spending for Each Service Area Divided by that Area's Service Population, for Fiscal Years 1965-66 Through 1995-96
- 77 State Population and Headcount Enrollment in California's Four Public Education Systems, for Fiscal Years 1965-66 Through 1995-96
- 78 Percentages of California's Population Represented by Headcount Enrollment in California's Four Public Education Systems for Fiscal Years 1965-66 Through 1995-96
- 79 Comparisons of Overall State General Fund Appropriations (SGF's) to Local Appropriations plus SGF's in the State's Three Public Higher Education Systems and of Changes in California's Population to the Systems' Combined Headcount Enrollments, for Fiscal Years 1965-66 Through 1995-96

National Comparative Higher Education Appropriations and Expenditures

- 80 Per-Capita State and Local Government Expenditures of State and Federal Funds for Higher Education in the Nation's Seven Most Populous States, and the 50-State Average, for Fiscal Years 1966-67 Through 1991-92
- 81 Annual Percent Changes in Per-Capita State and Local Government Expenditures of State and Federal Funds for Higher Education in the Nation's Seven Most Populous States, and the 50-State Average, for Fiscal Years 1967-68 Through 1991-92
- 82 Rankings of Per-Capita State and Local Government Higher Education Expenditures in the 30 Most Populous States with Cumulative 6-Year Average Expenditures, for Fiscal Years 1986-87 Through 1991-92
- 83 State Appropriations for Ongoing Higher Education Operations in the Nation's 35 Most Populous States and the Nation for Fiscal Years 1983-84 Through 1994-95
- 84 Percent Changes in State Appropriations for Ongoing Higher Education Operations in the Nation's 35 Most Populous States and the Nation, for Fiscal Years 1983-84 Through 1994-95 and for 11 Years

- 85 State General Fund Appropriations for Higher Education Current Operations in 13
 "Megastates," with Annual and Four-Year Percent Changes, for Fiscal Years 1989-90 to
 1994-95
- 86 State General Fund Appropriations for Operating Expenses of the University
 of California, the California State University, and the Public Higher Education
 Institutions Used for Faculty Salary Comparisons for Fiscal Years 1989-90 Through
 1994-95
- 87 Fifty-State Summary of State General Fund Appropriations to Higher Education,
 with Yearly Dollar Changes and Annual and Biennial Percent Changes, and Annual
 Percent Changes in Two National Price Indices, for Fiscal Years 1965-66 through
 1994-95

INTRODUCTION

IN THIS REPORT, the fifth in the Postsecondary Education Commission's *Fiscal Profiles* series, the Commission presents statistical information on the financing of the State's public higher education institutions. It also includes selected financial and enrollment information on public elementary and secondary education, and on California's independent higher education institutions.

Changes in the report since last year

New this year is a display showing the "State Appropriations Limit" (the Gann Limit) and funding under "Proposition 98" for California public elementary and secondary education, and the California Community Colleges. The appropriations limit -- a constitutional amendment approved by voters as Proposition 4 in 1979 and changed by Proposition 98 (1988) and Proposition 111 (1990) -- essentially limits the amount of money the State can spend. Proposition 98, the "Classroom Instructional Improvement and Accountability Act," is a constitutional amendment approved by the voters in 1988 and modified by Proposition 111. It sets a floor on the amount of money appropriated to K-12 education and the community colleges. Display 6 in this year's report tracks these two important State budget items back to their inception.

Display 10 in this year's edition substantially revises last year's information on appropriations for instructionally related activities, by major fund source, per funded full-time-equivalent student in the California Community Colleges, the California State University, and the University of California. In cooperation with the systemwide offices, the report now shows these expenditures into the early 1980s.

The most significant change to this year's edition is the inclusion of 11 displays of information on independent colleges and universities in California. The Association for Independent California Colleges and Universities (AICCU) provided this information which allowed Commission staff to construct Displays 42 - 52 on expenditure and tuition levels, financial aid amounts, and levels for the State's independent postsecondary sector. Also included here is information comparing various aspects of independent colleges in California with other states.

This year's report also contains greater detail on State University full-time-equivalent student (FTES) and Community College FTE by funding source (Display 56) and comparisons of per-capita spending for the State as a whole, public K-12 education, and the three public higher education systems, with per-capita spending in each of these three service areas divided by that area's own service population.

Highlights of the report

The 1995-96 State Budget was signed into law on August 3, 1995. For State higher education, this is the second budget in a row that provides increases in

Percent Changes in State General Fund Expenditures This Decade, from Fiscal Years 1990-91 Through 1995-96, with Amounts in Thousands of Dollars

Year	Health and Welfare	Youth and Adult Corrections	Public K - 12 Education	Higher Education	Other Government Services	Totals
1990-91	\$13,376,846	\$2,666,939	14,265,442	\$5,832,544	\$3,929,490	\$40,071,261
1991-92	13,680,048	3,049,195	16,416,016	5,831,201	4,326,899	43,303,359
1992-93	13,084,495	3,032,628	16,266,088	4,920,325	3,520,899	40,824,435
1993-94	13,282,325	3,383,337	14,480,796	4,680,629	3,128,835	38,955,922
1994-95	13,971,506	3,639,217	15,303,992	5,128,272	3,559,878	41,602,865
1995-96	11,703,424	3,675,782	16,912,845	5,311,631	4,481,851	42,085,533
Five-Year % Change.	-12.5%	37.8%	18.6%	-8.9%	14.1%	5.0%

NOTE The column titled "Other Governmental Functions" includes the following expenditure categories "Legislative, Judicial, Executive," "State and Consumer Services," "Business, Transportation, Housing," "Resources," and "General Government Services"

Source California Postsecondary Education Commission "Fiscal Profiles, 1995" report, Displays 1-3

State Funds for the public postsecondary systems In 1994-95, the State provided a solid maintenance budget for the systems, which stopped a four-year decline of State funding This year's budget implements a policy decision to hold constant resident undergraduate and graduate student fees in all the public postsecondary systems In addition, the State University and the University have reached a four-year funding compact with the Governor to provide modest, yet stable increases in their respective base funding through 1999 Further, AB 825 (W Brown) will provide significant increases in Proposition 98 funding available to public K-12 education and the community colleges However, enrollment growth is not fully funded, nor is financial aid Hence, the State's funding commitment to public higher education, relative to other "caseload-driven" State expenditure categories,

continues to wane. The chart on page 2 shows the cumulative percent change, by major expenditure category, of State General Fund appropriations over the past five fiscal years. (The five smaller expenditure categories -- "Legislative, Executive, Judicial," "State and Consumer Services," "Business, Transportation, Housing," "Resources," and "General Government Services" -- are combined and shown under the heading "Other Government Functions" for this display.) This change moderates some of the substantial changes in funding and percent changes in these categories over time.)

Changes in the Proportion of Total State-Determined Funds, by Fund Source, for California's Three Public Systems of Higher Education Between 1986-87 and 1995-96

California Community Colleges

The California State University

University of California

Note: Please note that the scale for the California Community Colleges differs from that of the others.
Source: Displays 1-3 and 48-54 below.

Overall, General Fund expenditures have increased 50 percent since 1990-91, but appropriations for higher education have declined by 89 percent over this time. This is the second lowest percentage "growth" of any of the State's expenditure categories. Changes in the other four categories are as follows: Health and Welfare, 12.5 percent decline, Youth and Adult Corrections, 37.8 percent, Public K-12 Education, 18.6 percent, and Other Government Functions, 14.1 percent. However, if past practice is any guide, it is likely that spending for some of the "caseload-driven" categories will exceed present estimates.

Proposed funding levels for the past year (1994-95) and budget year (1995-96) for the "caseload-driven" categories are very tentative estimates at this point and will only become firm as time and funds pass. As an example, the General Fund expenditure estimates for 1995-96 for the category

Health and Welfare assume a drop of approximately \$2.25 billion from 1994-95 levels, much of this dependent upon the federal government granting waivers and approving other specific changes in the operation of these programs. This level of funding also assumes favorable court rulings on present and pending litigation. It is also important to note that, in January 1994, the then-proposed 1994-95 Governor's budget assumed General Fund Health and Welfare spending of \$10.1 billion. However, the present estimate of 1994-95 Health and Welfare General Fund expenditures is nearly \$14 billion.

The State's financial commitment to public higher education over this decade is not keeping pace with other State programs, as measured by General Fund appropriations, and it also continues to decline relative to other fund sources. The chart on this page shows percent changes for the three public systems over the nine years from 1986-87 to 1995-96 in each of four "State-determined funds" funds over which either the State or the education systems themselves have policy control.

The proportion of California Community Colleges funds represented by combined State General Funds and local revenues has dropped by 2.6 percentage points since 1986-87, although these sources still account for 91 percent of the community colleges' State-determined funds. Meanwhile, resident systemwide student fee revenues at the community colleges, as a proportion of the total, have increased by 2.5 percentage points.

At the California State University, State General Funds as a proportion of the system's total State-determined fund appropriations have decreased by 12.9 percentage points. "Net" State University Revenues (that is, minus systemwide student fee revenues, which are displayed separately here) have grown by just 1.0 percentage point, and the revenue from resident systemwide student fees, as a share of the total, has increased by 10.2 percentage points during the last eight fiscal years.

At the University of California, State General Funds have dropped by 16.8 percentage points as a proportion of total State-determined funds, while General University funds (nonresident tuition and miscellaneous student and institutional revenues) have increased by 4.1 percentage points and resident systemwide student fee revenues have risen 12.8 percentage points. The 1995-96 State budget provides some hope for nearly all governmental functions in California, and higher education and K-12 education are no exception. If the budget's underlying economic assumptions are realistic, 1995-96 could be the beginning of an important "catch up" process for higher education funding during which institution's day-to-day operations, capital facilities, and student financial aid funding declines of the early and mid 1990s can be reversed -- hopefully, just in time for the latest swell of incoming students expected to enroll in the early 2000s.

Organization of the report *Fiscal Profiles, 1995*, has 87 statistical displays organized under these 15 major categories of information.

State General Fund appropriations

Displays 1 through 3 describe overall State General Fund appropriations, shares of total spending, and annual percentage changes in the nine programmatic areas the State uses to categorize its yearly spending plan for this fund source. Among the trends portrayed in these displays are the percentage increases in total General Fund appropriations compared to higher education General Funds over the past 28 years. Through 1995-96, higher education General Funds will have grown three-quarters as much as have total General Fund appropriations. This is an increase from the two-thirds of last year. Corrections spending still has outpaced all other categories and the total General Fund category since 1968-69, despite a 1995-96 percentage increase of only 1.0 percent.

The Total State Spending Plan

Displays 4 and 5 detail the Total State Spending Plan for the past 31 years, accounting for appropriations in all of the funding categories except for the category "Bond Funds," which is excluded so as not to double-count monies accounted for in the other categories used to service bonds. While many people cite State General Fund expenditures when describing State government spending, these funds represent less than one-third of the \$131 billion in total State spending in California. The greatest growth in spending in this year has been in "Special Funds," which includes dedicated-purpose revenue sources such as the gasoline tax and motor vehicle license fees.

Display 6 tracks the "State Appropriations Limit" (SAL) and "Proposition 98" funding. The information on the SAL shows that the State has gained increasing spending capacity under the limit in the past decade. For 1995-96, the State could have increased spending by more than \$7 billion and remained under the appropriations limit. This "gap" portends good news for California, should the economy fully recover from the more than four years of recession, and should State revenue growth accelerate. The Proposition 98 information shown here is more informational than explanatory, given the complex nature of this spending plan and the legislative and judicial activities surrounding it. For the new fiscal year, it is estimated that around \$26 billion will be spent on public K-12 and Community College education under Proposition 98. Just over 90 cents out of every dollar appropriated to meet the Proposition 98 funding guarantee goes to K-12 education and related agencies, with just under 10 cents going to the Community Colleges.

Funding per unit of full-time-equivalent student enrollment

Displays 7 through 10 show total funding from various sources of full-time-equivalent student enrollment for the California Community Colleges, the California State University, and the University of California. These displays show that average funding per FTE student from the State General fund has leveled off in recent years, while averages of combined State and student funds per student have steadily increased for all three systems. Display 10 contains substantially expanded information that averages appropriations per full-time-equivalent student for instructionally related activities in the public systems. Generally, these data show gradu-

al increases in these per-student averages of instructionally related costs for all three systems through the mid-1990s, although there has been a four-year leveling in the community colleges

Appropriations of funds for California public higher education

Displays 11 through 20 show total funding for the State's three public higher education systems, along with the annual percent changes in total funding for each system. The data are presented individually for each system, by revenue source, and in terms of the proportion of total funding represented by each fund source. The large amount of federal and other non-State money appropriated to the University of California somewhat discounts the magnitude of changes in its State-determined funding sources -- State General Funds places only third behind Extramural Funds and University Special Funds, in terms of dollars spent at the University. After years of decline as a proportion of total State University funds, State General Funds have remained fairly constant at just over 50 percent in the past three years, while Systemwide Student Fees has leveled off at just over 15 percent, as a proportion of total operating funds in the system. Since 1993-94, Local Revenues have represented a larger share of total operating funds (an average of 45.6%) for the community colleges than has State General Funds (an average of 43.2%). This last happened in the three years preceding the passage of Proposition 13 in 1978.

Categories of expenditure for the systems

Displays 21 through 25 show expenditures of general purpose funds for ongoing operations in each of the three public systems by the various expenditure categories used by each system. General purpose funds consist almost exclusively of State General Funds, local revenues (such as property taxes), and systemwide student fee revenues, along with some other system-specific fund sources. In addition, these displays include calculations of the proportion of total expenditures represented by each category of expenditure for each system. In both the State University and the University, the majority of State funds appropriated are spent on instruction.

Student tuition and fee charges and revenues

Displays 26 through 31 contain a variety of information on student resident fees and nonresident tuition at the State's three public systems and the revenues generated by these charges. As Displays 28 through 31 show, there is no increase in student fee levels for the 1995-96 fiscal year. Despite this, increases in total student fees in State University and the University have greatly outpaced growth in both the State and national inflation indices and in California Personal Income (Display 30). The community colleges also have no increase in the "State Enrollment" fee for 1995-96, the second straight year of flat fees for the system.

State financial aid

Displays 32 through 35 show funding for the State's Cal Grant A, B, and C stu-

dent financial aid programs for public, independent and proprietary postsecondary students. Included here are data on total funding for the programs, the number of new grant awards made available each year, and the maximum dollar amount of each grant award. Display 34 shows that the maximum dollar amount for the Cal Grant A, B and C programs are the same in the 1995-96 budget as they were in the pre-recession budget year 1989-90. Display 35 shows that the number of new Cal Grant A awards authorized in 1995-96 (17,400) is the same amount authorized in the 1985-86 State budget. The number of new Cal Grant B awards remain at the same number as in 1989-90, and new Cal Grant C awards authorized in the 1995-96 budget are at the same level as in 1985-86.

Capital outlay funds

Displays 36 through 41 show capital outlay (construction and building renovation projects) funding for the three public higher education systems, including both State and non-State fund sources. Due to the volatility and project specificity of the funding source "Other, Non-State," it is excluded from calculations of annual percent changes in total capital outlay expenditures. Total State funding for the systems' building programs is pieced together for 1995-96 from the remnants of various bond and special funds. Despite the increasing facilities needs in the higher education systems, the lack of an appropriate, stable funding source restricts the State's ability to fund higher education capital outlay.

California's independent institutions and public institution enrollments

Displays 42 through 52 show selected information for California's independent institutions belonging to the Association for Independent California Colleges and Universities (AICCU). Displays 42 and 43 show information on student financial aid for the AICCU member institutions. As Display 43 shows, the percentage of tuition at independent institutions covered by the maximum "Cal Grant A" award level has declined, from nearly 70 percent in 1981, to less than 37 percent in 1995.

Displays 44 through 49 deal with current fund revenues, enrollments and educational and general (E&G) expenditures in AICCU institutions. Of particular interest is the Instruction-Related Expenditures (I-R) per Full-Time Equivalent (FTE) student information in Display 49. These data show that for 1993-94, the most recent year these data are available, the AICCU institutions reporting here spent an average of \$14,305 per FTE student on activities related to the instruction of students. Increases in these expenditures have averaged around 3.5 percent each year this decade.

Displays 50 through 52 show information on the independent college and university sector in California in comparison to the sector of independent institutions in other States. Display 50 shows that, for 1994-95, six of the 34 states listed (Illinois, Michigan, New Jersey, New York, Pennsylvania, and Texas) spent more State funds on independent colleges than California. Growth in State appropriations to independent institutions has slowed significantly in the middle-sized and larger states in recent years due to the economic downturn of the 1990s. Display 52 shows that California has one of the nation's largest population students at-

tending independent colleges, in terms of both headcount and full-time equivalent enrollment. Commission staff will continue to cooperate with AICCU staff for next year's report to fill in the missing information for past years, in addition to revising the information to include the more recent years.

Enrollments in California Public Postsecondary Education

Displays 53 through 56 show headcount and full-time equivalent student enrollment for the California Community Colleges, the California State University, and the University of California. Display 54 shows that for the current 1995-96 year, headcount enrollment at the State University is anticipated to grow by 5,063 students (1.6%) and FTE enrollment by 2,000 students (0.8%). In the Community Colleges, headcount enrollment estimates were unavailable at the time of publication but FTE enrollment is expected to increase by 20,111 students (2.4%). Only enrollment projections were available for the University for 1995-96. Display 56 shows a breakdown of FTE enrollment in the California State University and Community Colleges. The State University information is shown by level of student, while the Community College's enrollment information is presented by funding source.

Price (inflation) indices, income growth, and system financial support

Displays 57 through 59 show actual index values, annual percent changes, and inflation factors (used for "constant-dollar" conversions) for selected State and national price indices -- including the Higher Education Price Index -- and for California Personal Income through 1995-96. Display 59 compares the annual percent changes in these indices with annual changes in State General and Local Funds in the three public higher education systems. Also included here are annual budgeted faculty salary adjustments and the Commission's yearly faculty salary parity adjustment calculations for the State University and the University. Information for the more recent years shows that the continued moderation of inflation -- as measured by the price indices shown here -- is expected to continue into 1996. Of note is the comparison in Display 58 of changes in California Personal Income since 1965-66 with changes in the U.S. and California price indices. Personal income in the State has grown nearly three times as fast as have the inflation indices. This gap is due, in large part, to the explosion of personal income, as measured here, during the high-inflation 1970s.

Actual and constant-dollar State-determined funds

Display 60 shows comparisons of fund sources labeled here "State-determined funds" for the State's three higher education public systems. These are fund sources (primarily State and local funds and student charges) for which the State and/or the education systems have policy-making or allocation authority. Displays 61 through 66 show appropriations of these funds sources for current operations in current (actual) dollars, 1995-96 "constant" dollars, and as appropriations per full-time-equivalent student. Since current information was available for the Higher Education Price Index this year, this price index was used to "deflate" these funds.

and arrive at the constant dollar amounts shown. The 1995-96 data for all three systems show that, State General Funds (plus local revenues for the community colleges) as a revenue source, when the impact of inflation is removed, have grown by fairly small amounts since 1969-70: 31 percent at the State University, 34 percent at the University, and 45 percent at the Community Colleges. Even when "deflated," systemwide student fees, as a revenue source and in terms of dollars per FTE student, have grown dramatically over this same period of time. In constant dollars, these revenues have increased 70 percent at the Community Colleges, 395 percent at the State University, and 359 percent at the University of California.

Hastings College of the Law, the California Maritime Academy and public school support

Display 67 shows State General Funds and total funds (including student fee revenues) for Hastings College of the Law. Beginning with the 1995-96 fiscal year, the California Maritime Academy became a campus within the California State University system. Since the Maritime Academy is now part of the State University system, and its budget information is thus included within information displayed for the State University, this publication will no longer show individual information for the California Maritime Academy.

Displays 68 through 71 show funding and enrollment information for California public elementary and secondary education. Total funding for public K-12 education in 1995-96 is approximately \$30.6 billion, up 6.9 percent over last year. Combined State and local funding for public K-12 education is more than \$1.6 billion, which averages out to around \$4,979 per funded student. Enrollment in the K-12 system is measured in units of "average daily attendance" (ADA), and the system's funding is primarily based upon levels of ADA. The system expects to generate more than 5.7 million units of ADA for the 1995-96 fiscal year, nearly 2.4 percent more than last year.

Per-capita and "Caseload" spending in California public education

Displays 72 through 75 show per-capita appropriations of revenue sources for current operations for the public K-12 and public higher education systems. Display 75 shows average per-capita "combined" fund spending for the four public systems individually and in combination for the past 30 years. It indicates that total 1995-96 average per-capita appropriations for the four systems increased by \$45 this past year to just over \$1,179.

Display 76 shows changes in the averages of State and combined fund appropriations, per person, for people served in the two education areas of State finance and for the State as a whole. First, the combination of State General Funds, Local Tax Revenues, and Nongovernmental Cost Funds (see Display 4) are divided by State population, similar to the calculation for State's "per-capita" spending. Then, for public higher education, combined State, local, and student-fee revenues are divided by headcount enrollment to provide caseload average appropriations. Finally, K-12 combined (State and local) funding is divided by K-12 headcount en-

rollment. These measurements show that, relative to increases in its service population, higher education State funding has had the lowest overall growth of the three in the past 30 years. Display 79 shows this comparison in total dollars and again shows the lag in higher education funding, relative to increases in student enrollment, in comparison to overall State funding.

National comparative higher education appropriations and expenditures

Displays 80 through 87 present information comparing spending on higher education among states. Displays 80 through 82 use information compiled by the Bureau of the Census in its publication, *Government Finances*. The federal government defines some sources and uses of funds differently than does California and excludes some fund sources for higher education in its calculations that California includes. As a result, calculations of per-capita expenditures in Displays 80 through 82 are not comparable with those in the earlier displays in this report, but they are included here because they contain the only government data available that control for state variances to produce consistent comparisons of higher education spending across the country. It is important to note that these data include federal funds.

Display 80 shows per-capita spending on higher education in the nation's seven most populous states since 1967, with Display 81 showing the annual percent changes in these expenditures. Display 82 expands this comparison to cover the 30 most populous states for a six-year period (1986-1992). California continues to have the highest level of per-capita expenditures of the seven most populous states, 13 percent higher than the next highest state (Texas). The large increase for Pennsylvania is a one-time phenomena attributed to a decision to add three institutions to the state's reporting base for these expenditures.

California has been in the top 10 of the states measured here for the earlier four of the six years shown, ranking thirteenth in 1990-91 and rising to eleventh in 1991-92. California's six-year cumulative ranking is tenth among the 30 states. It ranks third highest behind Michigan (the eighth most populous) and North Carolina (the tenth most populous) of the 10 most populous in per-capita expenditures for higher education. Generally, the states with largest per-capita expenditures for education and most other program areas have smaller populations. Iowa ranks first here, and is thirteenth in population, Arizona is fourth here and twenty-third in population, and Oregon is fifth here and twenty-ninth in population.

Display 83 shows appropriations of State funds (as defined by the U.S. government) for the 35 most populous states for the past 11 years. California has the largest higher education appropriations -- \$1.6 billion higher than the next closest state (New York) in the 1994-95 fiscal year. This difference was also evident last year, however, it continues a steady decrease in this spread from past years when California appropriated more than \$3 billion more than the nearest state in 1990-91.

Display 84 shows the annual percent change for the past 10 years and the cumulative 12-year change in the higher education appropriations of the 35 most populous states and the nation at large. Information from the 1982-83 fiscal year that

was published in earlier years, but is not shown here, is used as the base year for this comparison. California's 49 percent increase in these appropriations over the past 12 years is only two-thirds the 76 percent growth in these appropriations nationally. Of the seven largest states, in terms of population, Illinois has enjoyed the greatest growth (88%) in operating funds.

Display 85 compares State funding for higher education between 1989-90 and 1994-95 in 13 heavily populated and large industrial states, a group called the "Megastates" by Peirce (1972). Due to its sheer size, California's appropriations far eclipse those of the closest state, and thus this display also includes State funds for the California State University and the University of California as the equivalent of a state. These two institutions together -- without the addition of the California Community Colleges and other higher education institutions and agencies -- would constitute the second largest "state" in terms of state-funded higher education appropriations in each of the past five fiscal years. The funding difference between "CSU/UC" and the state with the next largest higher education appropriations was almost a billion in 1990-91 and only \$92.7 million in 1993-94, however, it increased to more than \$316 million in 1994-95. The display also ranks the 13 states by their annual percentage change in appropriations of State funds for higher education. For the most recent year-to-year, California ranked tenth with a growth of 3.0 percent. California has ranked thirteenth between years 1991-92 and 1993-94 in annual percent change and ranks thirteenth for the cumulative percentage change in funding between 1989-90 and 1994-95. Were the California State University and the University of California taken together as a separate state ("CSU/UC") for the purposes of this comparison, its five-year cumulative percent change in appropriations would, on average, rank it third-from-the-last, ahead of California and Virginia.

Display 86 compares State General Fund appropriations for current operations of the California State University and the University of California over the past six years with those of their respective national public faculty salary comparison institutions. State funding for both the State University and the University continues to lag their respective public comparison institutional groups in this measurement. Continuing a trend of recent years, including the State University or the University in the calculations of the six-year percentage change for their respective public comparison group lowers the average percentage change of the respective groups. The six-year percentage change in appropriations to the group of four public faculty salary comparison institutions for the University of California was a 3.1 percent increase. However, when the University itself is counted as part of this group, this changes to a 7.5 percent decrease. Similarly, the State University's public faculty salary comparison institutions as a group have seen an average increase of 8.1 percent in their combined General Fund appropriations between 1989-90 and 1993-94. Including the State University in the comparison group, lowers the increase to 3.9 percent.

Finally, Display 87 has been revised and expanded to show a summary of State General Fund appropriations for ongoing higher education operations in the 50 states over the past 30 years, along with annual and two-year percent changes.

Changes in the United States Consumer Price Index (U S CPI) and the Higher Education Price Index (HEPI) are also shown here for comparisons. The data show that the annual percent change in these appropriations generally outstrips annual increases in both the U S CPI and the HEPI.

**Definitions
used in the report**

The Commission has used the following definitions of terms in this report

Bond Funds: The capital outlay displays identify two types of bonds "General Obligation Bonds" and "Other State Bonds." "General Obligation Bonds" are general issue bonds that are approved by the Legislature and State voters with repayment guaranteed from the State's general revenue source (i.e., taxes). "Other State Bonds" are revenue bonds that are sold to fund specific projects whose repayment is guaranteed by revenues that the funded project is expected to generate. Examples of the types of projects funded by revenue bonds are parking structures and dormitories. These operations charge fees to their users, and those fees are used, in part, to retire the accumulated debt of the bonds.

Cal Grants A, B, and C: The Cal Grant A Program helps needy students with the tuition and fees portion of the costs involved in attending college. Grant winners are selected on both the basis of need and grade point average. The Cal Grant B Program provides a living allowance and sometimes tuition and fee aid for low-income students. The Cal Grant C Program helps vocational education students with tuition and training costs.

COFPHE: Capital Outlay Fund for Public Higher Education are defined as COFPHE. They are derived from Tide Lands oil revenues and collected by the State Lands Commission.

Continuing Education Revenue Fund: Revenue generated by fees from the following nontraditional programs: concurrent enrollment, extension, and external degree.

Extramural Funds (University of California): All funds not included in the University of California's budget, hence, the terms *extramural* and *non-budgeted* are used interchangeably. These funds include sponsored research financed by federal contracts and grants, federal appropriations for the Department of Energy Laboratories, funds related to State agency agreements, and funds from private gifts and grants. These resources are designated as extramural because, with the exception of the laboratories, they are negotiated from year to year (or are negotiated after the end of the contract or grant period) and have no permanence attached to them. They are, therefore, appropriated outside of the budget.

Federal Mineral Tax: Funds generated from federally leased lands used for the production of geothermal energy, oil, gas, and minerals. The federal government collects 100 percent of the lease revenue and turns over 50 percent of it to the State.

Funded Units of Enrollment. Government services are usually funded based on workload measures that typically are a statistical calculation of the number of clients to be served. For California public K-12 education, the unit of workload measure is "Average Daily Attendance," or ADA. One ADA in public K-12 education equals the number of days a student attended school during an academic year divided by the number of days school was in attendance that year. A student is assumed as being in attendance for a school day if she or he is there for one session during the day or if he or she had an excused absence.

California's public higher education systems use the term "full-time-equivalent student" (FTES) to describe their unit of measure for funded enrollment. For the California Community College, one FTES is defined as 15 student contact hours in the classroom, per week, over a 35-week period, which is an academic year in the community colleges. Another way of defining it is that one FTES is a student's weekly student contact hours divided by 525 ($15 \times 35 = 525$).

For the California State University, the term FTES is defined to be 15 semester or quarter units. Variations in the academic calendars of the campuses of the CSU are taken into consideration in the definition of the annual FTES, which is equivalent to 30 semester or 45 quarter units. With these definitions, the number of individual students on campus is difficult to determine, but the total volume of instructional activity is more accurately reflected.

For the University of California, one undergraduate FTES in the semester system is student enrollment in 15 semester units for two semesters. One graduate FTES in the semester system is student enrollment in 12 semester units for two semesters. In the quarter system, the totals are 45 undergraduate credit units and 36 graduate credit units per academic year, respectively.

Independent Colleges. The information in Displays 42 through 52 was supplied by the Association of Independent California Colleges and Universities (AICCU). AICCU membership is comprised of 72 non-profit, degree granting, and Western Association of Senior Colleges (WASC) accredited colleges and universities. AICCU estimates that a total of 112 degree-granting and non-profit institutions actually operate in California. However, the vast majority of the 40 non-AICCU member institutions are either not regionally accredited or they are seminaries with a student body very different than traditional degree-granting institutions. AICCU further estimates that, of these 40 institutions, fewer than five are eligible for AICCU membership. AICCU members account for an estimated 98 percent of the independent sector's total enrollment in California postsecondary education. AICCU institutions also account for 93 percent of the State financial assistance received by students attending an independent college or university in the state. For the California-specific information in Displays 42 through 49, information was compiled from 70 of the 72 association member institutions. The national data on independent institutions in Displays 50-52 was taken from an information network on state assistance programs for independent accredited colleges and universities. It is important to note that, since much of this reporting is done on a voluntary basis, the year-to-year mix of reporting institutions may change and this may have an impact upon the data reported.

The AICCU non-profit independent colleges and universities should not be confused with “proprietary” schools or “for-profit” and degree granting institutions that are not regionally accredited.

Inflation Measures: The report utilizes various statistical measurements of periodic changes in prices as a yardstick for gauging the effect of increased costs and financial obligations on funding for California’s public colleges and universities, on levels of student charges (tuition and fees), and faculty salaries. These price (inflation) indices are explained below, using information and descriptions provided by the U S Bureau of Labor Statistics, the California Department of Finance, and material in the book *Inflation Measures for Schools & Colleges. 1993 Update* (Research Associates of Washington, September 1993)

U.S. CPI: The United States Bureau of Labor Statistics “Consumer Price Index for All Urban Consumers”, or U S CPI is a measure of the average change in prices over time in a fixed market basket of goods and services purchased by U S residents. According to the Bureau, the items included in the pricing survey include food, shelter, transportation costs, medical and health care, and all of the taxes directly resulting from these purchases. Items in this market basket are weighted for importance in the base year, as determined by a survey of consumer expenditures, relative weights change over time as the price of items rises more or less rapidly than the overall index. Prices are measured in 85 geographic areas around the country, utilizing more than 57,000 housing units and 19,000 retail businesses. The U S CPI is based on monthly pricing of the market basket and this pricing occurs throughout the entire month.

California CPI: The California Consumer Price Index is calculated by the State’s Department of Industrial Relations, in consultation with the California Department of Finance, and is conceptually based upon the U S CPI. It was initially established as a population-weighted average of the five-county Los Angeles area and the 10-county San Francisco all-items survey in the late 1940’s.

HEPI. The Higher Education Price Index -- HEPI -- was developed by Dr. Kent Halstead of Research Associates of Washington. It measures the average relative level of prices for goods and services purchased by postsecondary institutions through current educational and general expenditures (E&GE). In this way, HEPI shows changes in the costs of services unique to colleges and universities (such as, faculty salaries, instructional equipment, etc.) in addition to more traditional expenditure categories, such as plant maintenance and utilities. Sponsored research, sales and services of education departments, and other for-profit or auxiliary enterprises are not included in the calculation of HEPI.

Specifically, according to Dr. Halstead, HEPI is based upon the following: (1) salaries of college personnel, from faculty and administrators to clerical and non-professional, (2) contracted services, such as data processing, communication, transportation materials and supplies, maintenance, and equipment, (3) library acquisitions, and, (4) utilities. Weights are assigned to these items representing the rela-

tive importance of each item in the current E&GE budget. These data are collected from a variety of sources, including salary surveys conducted by the American Association of University Professors and the College and University Personnel Association and U.S. CPI information from the Bureau of Labor Statistics, of the U.S. Department of Labor. Information from other price indices is also in the calculation of the HEPI. These indices are discussed next.

Other Price Indices The following price indices are also used or referenced in this report:

- 1 *The Academic Library Current Operations & Acquisitions Price Index (LPI)* The LPI reports the relative year-to-year price level of goods and services purchased by postsecondary institution libraries for their current operations. The priced components of LPI are organized into three parts -- personnel compensation, acquisitions and contracted services, and supplies and materials.
- 2 *The Elementary-Secondary School Price Index (SPI)* The SPI measures the effects of inflation on the current operations of elementary and secondary schools. It reports relative price levels that schools pay for a fixed group of goods and services for their daily operation. These expenses include administration, instruction (mostly teacher salaries), plant operation and maintenance, and other costs. Costs excluded are capital outlay and debt service.
- 3 *The Research and Development Price Index (R&DI)* The R&DI measures changes in the price of goods and services bought by colleges and universities through current direct expenditures for sponsored research, excluding indirect (overhead) research costs charged to other departments. The direct expenditures for sponsored research priced by the R&DI consists of salaries and wages for professional and nonprofessional personnel, fringe benefits, contracted services, supplies and materials, and equipment.
- 4 *The Boeckh Construction Index (Boeckh)* The Boeckh index is computed by the Boeckh Division of the American Appraisal Company. It is a measurement of inflation on building apartments, hotels and office buildings -- a mix of facilities relatively applicable to structures built on college campuses. The Boeckh index is a "fixed input" type of index of wage rates and building material prices weighted together. It covers the structural portion of building and all integral plumbing, heating, lighting and elevators.

Instruction-Related Activities (I-R) This term is used to define the system average expenditures for instructional activities in the postsecondary education sectors. The public-sector information on instruction-related expenditures was initially generated for the Commission report, "Expenditures for University Instruction" (Commission Report 93-2) which contains background detail on the numbers shown here. The methodology for determining these instructionally-related revenue data was agreed to by the Commission, the three public higher education systems, the Department of Finance, the Office of the Legislative Analyst, and other officials involved with the earlier project. For the California Community Colleges and the California State University, these expenditures were determined

by dividing each systems selected fund sources for a given year by their full-time-equivalent (FTES) enrollment for that year to determine average State support per funded student. For both the Community Colleges and the State University, "State Determined Funds" (please see definition below) were used. For the University of California, a more detailed methodology was developed. In this methodology, funds not related to general campus instruction were removed prior to calculating average State support per funded student. These calculations removed expenditures for health sciences, organized research, and public service from the University's "State Determined Fund" sources. For the independent institutions surveyed here, the AICCU used data from the "Integrated Postsecondary Education Data Survey" (IPEDS) to show total instruction-related expenditures for participating independent institutions.

Local Revenues This fund source for public K-12 Education and the California Community Colleges is local property taxes, including local government agencies' debt service, excess property tax payments, and State property tax subventions. For the community colleges, these revenues also include non-resident student tuition paid by persons attending the colleges whose legal residence is in another state or country.

Proposition 98 The following description of Proposition 98 was developed based upon information provided by the State Treasurer. On November 8, 1988, voters of the State approved Proposition 98, the "Classroom Instructional Improvement and Accountability Act," a combined initiative constitutional amendment and statute designed to guarantee public primary, elementary, secondary and community college education (referred to as K-14) a minimum share of the State's General Fund revenues each year. Other State agencies (the departments of Developmental Service and Mental Health, the State Special Schools, and the California Youth Authority) also receive funding under Proposition 98, however, their combined share is less than one-third of 1 percent of annual Proposition 98 funding. The initiative was later modified by provisions contained in Proposition 111, approved by the voters in June of 1990.

Under Proposition 98 -- as modified by Proposition 111 -- K-14 is to get the *greater* of (a) in general, a set percentage of General Fund revenues (commonly referred to as "Test 1"), (b) the amount of General Funds appropriated to K-14 in the prior fiscal year, adjusted for changes in the cost-of-living (as measured by changes in State per-capita personal income) and enrollment ("Test 2"), or, (c) a third test that replaces "Test 2" in any year in which the percentage growth in per-capita General Fund revenues from the prior year plus 0.50 percent is less than the percentage growth in State per capita personal income ("Test 3"). Under "Test 3", K-14 receives the same amount appropriated to it in the prior year, adjusted for changes in enrollment and per capita General Fund revenues plus another small adjustment factor. In any year that "Test 3" is used, K-14 receives as a "credit" for future, higher General Fund revenue years the difference between the "Test 3" amount and the amount that would have been appropriated under "Test 2."

Originally, implementing legislation for Proposition 98 set the K-14 "Test 1" fund-

ing guarantee at 40.3 percent of General Fund tax revenues, however, that percentage was recalculated and adjusted downwards to 37 percent in 1992-93 to account for a redirection of local property tax revenues to K-14. State funding formulas take into account local property tax revenues and other local funds available for K-14 when determining K-14's share of General Fund revenues. This calculation and a subsequent recalculation of the General Fund guarantee, along with several other issues related to the State's interpretations of its Proposition 98 funding responsibilities for K-14 in recent years, are presently the subject of litigation. Preliminary agreement has been reached between parties litigating various aspects of the Prop. 98 funding guarantee, increasing the prospect for stable funding under the initiative for the near future. Preliminary agreement has been reached between parties litigating various aspects of the Proposition 98 funding guarantee, increasing the prospect for stable funding under the initiative for the near future.

Public Service For the University of California, activities funded within this category include campus public service, cooperative extension, the contract with the Charles R. Drew University of Medicine and Science, and the California College of Podiatric Medicine conducted cooperatively with the University's San Francisco School of Medicine. Campus public service programs include the California Mathematics Project, California Writing Project, Community College Transfer Centers, EQUALS, Lawrence Hall of Science, MESA, Puente, California Articulation Number, Scripps Aquarium-Museum, and the Tertagon Registry.

Restricted Funds Budgeted funds within the University of California that are not identified by a 199XX fund number and that are earmarked for specific purposes, such as hospital income for teaching hospitals, fees for University Extension courses, room and board charges for dormitory operations, and the like, are restricted funds.

SAFCO Special account for capital outlay are designated as SAFCO. This fund is also supplied with tidelands oil revenues.

State Appropriations Limit As described by the materials from the State Treasurer, the State of California is subject to an annual limit on its appropriations imposed by Article XIII B of the State Constitution, which was adopted by the State's voters as Proposition 4 in 1979. This "State Appropriations Limit" (SAL) was significantly modified by the voters in Proposition 98 and Proposition 111 (discussed above). Nearly all State authorizations to spend proceeds of taxes are subject to the SAL. Essentially, this phrase refers to tax revenues, some regulatory license fees, and "excess" user fees (fees collected above levels needed to provide the service for which they are being collected). "Proceeds of taxes" excludes most State subventions to local governments, tax refunds and some benefit payments, such as unemployment insurance.

Specifically excluded from the SAL are appropriations for (1) debt service on bonds in existence prior to January 1, 1979 and those bonds approved by the voters subsequently, (2) appropriations required to comply with mandates of courts or the federal government, and (3) appropriations for "qualified" capital outlay.

projects and appropriations derived from State gasoline tax increases and motor vehicle weight fee increases, per Prop 111 (explained below) Several initiatives approved in recent years were specifically written to be exempt from the Article XIII limits and were structured to create new revenue sources dedicated to specific uses, such as the tobacco tax increase in Proposition 99 in 1988 The SAL may also be suspended in cases of emergency as declared by the Governor (natural disasters and civil disturbances) If the SAL is otherwise exceeded (i.e., appropriations are made over the limit, approved by a two-thirds vote of the Legislature and approval by the Governor), the entire excess must be recaptured over the next three fiscal years by lowering State appropriations

Originally, the SAL was based on actual fiscal year 1978-79 authorizations, however, this changed starting in fiscal year 1991-92, per the provisions of Proposition 111 The 1991-92 SAL was recalculated with 1986-87 SAL and implementing the annual adjustment procedures spelled out in Prop 111 These provisions require that the SAL in each year be based on the State limit for the prior year, adjusted annually for changes in State per-capita personal income and changes in population When applicable, this adjustment would also account for transfers of the financial responsibility for providing public services among units of government As amended by Prop 111, the SAL is tested (calculated) over consecutive two-year periods, with any excess "proceeds of taxes" collected over that time that fall above the combined SALs for those two years split equally between K-14 education and refunds to taxpayers

State Determined Funds. The term "State-Determined Funds," as defined here, includes only those fund sources used for operating expenses for the general, non-restricted educational missions of the three public higher education systems over which they and/or the State (through the Legislature and Governor) have policy and allocation authority. For the California Community Colleges, these funds are State General Funds plus Local Revenues, Systemwide Student Fees (SSFs), and State School Funds, and Lottery Funds For the California State University, these funds are State General Funds, State University Funds, Systemwide Student Fees (SSFs), and Lottery Funds State University Funds are "Higher Education Fees and Income," minus the State University Fee -- SSFs here -- (please see "1995-96 Governor's Budget," page E 55, Table 3) For the University of California, these funds are State General Funds, General University Funds, Systemwide Student Fees (SSFs), and Lottery Funds General University Funds are "General Funds Income," under the heading "University Sources" (please see "1995-96 Governor's Budget," page E 38, Table 3, line 28)

State General Fund. The State General Fund is the main account for State revenues from which appropriations for most State programs emanate It is used to account for all revenues and activities financed therefrom that are not required by law to be accounted for by any other fund Most State expenditures are financed from the General Fund Normally, the only difference between the General Fund and the other governmental cost funds are constitutional or statutory restrictions placed on the use of the other governmental cost funds

UCRP. University of California Retirement Program A retirement system set up for University of California employees

University Funds All University of California-generated income that is classified as General Purpose Resources (budgeted under a 199XX fund number) and that includes nonresident tuition, the State's share of overhead receipts from federal contracts and grants and the Department of Energy Laboratories management fee, interest earned on General Purpose Resource Fund balances, application fee income and income from certain other student fees and charges, and miscellaneous sources such as farm income, and sales and service income

Acknowledgments The Commission acknowledges with appreciation the assistance of the following agencies and organizations that provided information and assistance for this report

Association of Independent California Colleges and Universities

Center for Higher Education, Illinois State University, Department of Educational Administration and Foundations, Normal Illinois

Notes

- 1 PLEASE see the footnotes for this display in the appendix to this report for IMPORTANT information
- 2 Except for the Cal Grant A Maximum Award, data on this table are for AICCU member institutions only
- 3 Weighted Average Tuition represents the average amount paid by students, not the average amount charged by institutions
- 4 Weighted Average Tuition is derived by multiplying student FTE enrollment for each institution by total tuition and fee revenue for the institution, adding these figures for all institutions and dividing the total by the number of AICCU institutions

APPENDIX: NOTES AND SOURCES

DISPLAY 1

1 Some of the departments and agencies presently within the expenditure categories displayed here were located within other categories in past years. This occasionally results in substantial changes in funding levels within the categories, as a whole, over the years. Additionally, some entire expenditure categories were contained within other categories in earlier years' budgets. These categories have been disaggregated here so as to maintain a consistent format for programs and categories across the many years of this display.

2 The substantial percentage increases in K-12 Education General Funds in fiscal years 1978-79 and 1979-80 were the results of the replacement of monies provided by the State to partially offset local property tax revenues lost with the passage of Proposition 13 in June of 1978.

3 The expenditure category "Resources" includes funding for the "California Environmental Protection Agency," which is displayed as a separate expenditure category beginning with the 1991-92 budget. Due to its small size and the short time it has been displayed as a category, funding for this department is still included in the category "Resources" in order to maintain consistency with data presentations for earlier years.

4 The expenditure category "Business, Transportation, and Housing" includes funding for the "Trade and Commerce Agency," which is displayed as a separate expenditure category beginning with the 1993-94 Budget. Due to its small size and the short time it has been displayed as a category, funding for this department is still included in the category "Business, Transportation, and Housing" in order to maintain consistency with data presentations for earlier years.

5 For recent fiscal years, the expenditure category "General Government" has account for nearly all "budgetary savings" (monies allocated but not anticipated to be spent) assumed to be generated throughout all nine of the State's expenditure categories. These savings (mostly estimates) are displayed as spending reductions, thus, the expenditure totals in this category may fluctuate significantly from one year to the next as data on actual savings becomes available. For fiscal year 1995-96, the substantial spending increase in this category is due primarily to interest repayments made on revenue anticipation notes (RANs) and registered reimbursement warrants (RAWs) and to a decrease in estimated budgetary savings.

6 Spending in the category "Legislative, Executive, and Judicial" for fiscal year 1995-96 is increased substantially for the Governor's Trial Court Funding Initiative, under which the State is to assume greater funding responsibilities for this government function from cities and counties.

7 It is important to note that nearly all programs in the nine State expenditure categories receive sometimes substantial funding from sources other than the State General Fund. These sources include billions of dollars in federal funding, user fee revenues, and local

property tax monies. The categories public "K-12 Education" and "Higher Education" (specifically the state's community colleges system) in particular receive billions of dollars in local tax revenues. Please see Displays 4 and 5 for further information on the overall State spending plan.

8 Information shown for fiscal years 1994-95 and 1995-96 was provided by the Department of Finance and reflect the appropriations levels contained in the 1995-96 Budget Act.

Sources: Governor's Budgets, 1969-70 through 1995-96 (Schedules 9 and 3), the Department of Finance.

1 Please see the footnotes in Display 1 for information on the data in Displays 1 through 3.

2 Information shown for fiscal years 1994-95 and 1995-96 was provided by the Department of Finance and reflect the appropriations levels contained in the 1995-96 Budget Act.

Sources: Governor's Budgets, 1969-70 through 1995-96 (Schedules 9 and 3), the Department of Finance.

DISPLAY 4

1 This display is compiled from the "Total State Spending Plan," presented in Schedule 2 of the annual Governor's Budget. It is constructed for informational purposes to show in one place the expenditures of all funds which are accounted for by the State. In designing Schedule 2, State officials have attempted to minimize double-counting of expenditures, misinterpretations of fund sources and balances, differences in accounting methods between funding categories and other problems impacting data consistency and accuracy.

2 The State "General Fund" is the predominant fund for financing State operations. The primary sources of revenue for the General Fund are the personal income tax, sales tax and bank and corporation taxes. Please note that this display shows General Fund *revenue* totals and will differ from the General Fund *expenditure* totals shown in Display 1. Additionally, this display's General Fund totals include fund balances, carryovers, and other unspent funds not included in Display 1.

3 "Special Funds" is a generic term used for "governmental cost

funds" other than the General Fund. Governmental cost funds, generally, are funds used to account for revenues from taxes, licenses and fees where the use of such revenues is restricted by law for particular functions or activities of government, such as gasoline taxes dedicated solely to transportation programs.

4 The term "Federal Funds" describes all funds received by the State directly from an agency of the federal government but not those received through another State department.

5 "Local Property Tax Revenues" are revenues generated from assessments, or tax levies, that are enacted by local governmental units based on the value of tangible property. Locally, the monies generated by these assessments are distributed by the county auditor to cities, counties, school districts and other "special" districts, and to redevelopment agencies.

6 "Nongovernmental Cost Funds" is a category used to account for monies derived from sources other than general or special taxes, licenses, fees or other State revenues. These funds differ from "Special Funds" in that they are not generated by, nor designated for, specific governmental activities. Classifications of these funds include Public Service Enterprise Funds, Working Capital Revolving Funds, Bond Funds, Retirement Funds, and other funds including Local Property Tax Revenues. For the purposes of this display, local property tax revenues are displayed as a separate fund source in Displays 4 and 5, and are *not* included in this report as nongovernmental cost funds.

7 Only estimates of appropriations accounted for as "Nongovernmental Cost Funds" were available for fiscal years 1975-76 and 1976-77. No methodologically consistent information on nongovernmental cost funds was not available prior to the 1975-76 fiscal year.

8 Omitted from this display is the appropriation category "Selected Bond Funds," since bond proceeds are accounted for as expenditures in one or more of the other classifications in this display when debt service is paid on the bonds.

9 The information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget, updated by the Department of Finance. Information for earlier years was provided by the Department of Finance, the Legislative Analyst's Office, and State Board of Equalization.

Sources: Governor's Budgets, 1967-68 through 1995-96, Schedules (parts A and B) and 1 (parts B and C), and for earlier years Schedules 3, 4, 5, and 6, State Board of Equalization Annual Reports, and supplemental information.

DISPLAY 5

1 Please see the footnotes for Display 4 for information on the data in Displays 4 and 5.

Sources: Governor's Budgets, 1967-68 through 1995-96, Schedules (parts A and B) and 1 (parts B and C), and for earlier years Schedules 3, 4, 5, and 6, State Board of Equalization Annual Reports and supplemental information.

DISPLAY 6

1 Please see the definitions of "the State Appropriations Limit" and "Proposition 98" at the end of the text in the first part of the report. The funding for Prop 98 funding shown here is on an "ad-

justed cash" basis, that is, these funds represent the actual amounts appropriated to the funded entities. This differs from fiscal information shown on a "budgeted basis," where amounts shown are only what was initially intended to be spent in a given fiscal year. Only the Prop 98 data for the present (1994-95) and budget (1995-96) years are not actual expenditure amounts.

2 For the Proposition 98 information, "Related Agencies" includes the California Youth Authority and State Special Schools. These agencies offer generally pre-college instruction to their clients, usually in consultation with State and local K-12 school officials.

3 No official "SAL Balance" was calculated for fiscal years 1978-79 and 1979-80, for fiscal years 1982-83 through 1984-85, only "NET Total SAL Appropriations" data are available.

4 The information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget, updated by the Department of Finance. Information for earlier years was provided by the Department of Finance and the Legislative Analyst's Office.

Sources: Governor's Budgets and Summaries, 1980-81 through 1995-96, Schedule 13 (parts C through E) and other data tables, and supplemental information.

DISPLAY 7

1 "Combined Revenues" for the University equal State General Funds plus "Systemwide Student Fees" (SSF).

2 The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst and other available information. "Revenues per FTES" equal revenue sources divided by FTES, "Combined" revenues are divided by SSF to determine "SSF as % of Totals."

3 "SSF" consists of "Educational" fee, "University Registration" fee, and the "Special" fee for selected professional students initially established in the 1990 Budget Act for law and medical school students at UC, then expanded to include other professional schools in the 1994-95 budget.

4 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, University of California, Office of the President, and supplemental information.

DISPLAY 8

1 CSU State General Funds for 1982-83 through 1987-88 are "Net General Funds," as transmitted by the CSU Chancellor's Office. Amounts for these years were re-calculated to extract all appropriated revenues (student fees), per a change in the State's definition of CSU State General Funds.

2 "Systemwide Student Fees" (SSF) for the CSU consists of "State University" and "Student Services" fees. Prior to the 1975-76 fiscal year, the State University's "Student Services" fee was entitled the "Material and Services" fee. "State University" fee

was established in 1981-82, while the "Student Services" fee was abolished after 1985-86. The University Fee revenues for 1995-96 consists of estimates contained in the 1995-96 Budget Act, based upon estimates of 1995-96 CSU FTES of 252,000.

3 The California Maritime Academy (CMA) will officially become the California State University's (CSU) 22nd campus starting with fiscal year 1995-96, thus, this report no longer includes a separate display for the CMA. The Governor's 1995-96 Budget has combined the CMA's figures with the CSU's for 1993-94 actual data, 1994-95 current year estimated data, and 1995-96 budgeted data. In future years attempts will be made to combine all past-year CMA data with the historical information for the CSU to maintain consistency with the present arrangement.

4 "Revenues per FTES" equals revenue sources divided by FTES, "Combined" revenues are divided by SSF to determine "SSF as % of Totals."

5 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act. For this publication, the entire series of CSU FTES enrollment information was updated by the CSU Chancellor's Office, Analytic Studies Division, please see the notes for Display 56 for further information on these data.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, supplemental information.

DISPLAY 9

1 In 1991-92, the California Community College's ADA enrollment was converted to FTE student enrollment, and is now shown as such, comparable to enrollment in UC and CSU. Only "State and Local Funded" credit and non-credit FTES funded by State and local appropriations are shown here, excluded are federally and other-funded FTE enrollment. All of the measurements of funding per FTE enrollment for the community colleges use only "State and Local Funded" FTE student enrollment. Please see Display 56 for an additional breakdown of community college FTE student enrollments. The Chancellor's Office of the California Community Colleges updated the community colleges' entire data series of FTE enrollment information for this publication.

2 Beginning in 1984-85, "Combined Revenues" include monies from the "State Enrollment Fee," which was implemented that year. State Enrollment Fee monies are not shown separately here, only as part of Combined Revenues. "State Enrollment Fee" annual totals are shown in Display 26.

3 "State and Local Funds Per FTES" include Local Revenues, as Community College General Fund levels are partially dependent on these local revenues.

4 Proposed "State Enrollment Fee" revenue estimates for 1995-96 are those contained in the 1995-96 Budget Act.

5 Included here are State General Funds loaned to the community colleges in 1992-93 and 1993-94 State budgets (\$241 million and \$178 million, respectively). State General Funds loaned to the community colleges in 1992-93 (\$241 million) and 1993-94 (\$178 million) State budgets. Also included are \$47 million in SGFs appropriated as "backfill" (State funds to make up for shortfalls in property tax collections) for 1994-95 and \$26 million in block grants for 1995-96. The 1995-96 block grant counts toward

the 1994-95 Proposition 98 "Funding Guarantee" (Please see "definitions" section).

6 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis and background information, 1967-68 through 1995-96, supplemental information.

DISPLAY 10

1 This display contains information on revenues used for instruction-related activities for California's three public higher education systems in various fiscal years, by fund source and averaged over FTES enrollment for each system. Additionally, this year are incorporated data from the AICCU showing expenditures -- not fund sources -- for instruction-related activities in 70 of the association's 72 member institutions. The public-sector information was initially generated for the Commission report, "Expenditures for University Instruction" (Commission Report 93-2) which contains background detail on the numbers shown here. The methodology for determining these instructionally-related revenue data were agreed upon by the Commission, the three public higher education systems, the Department of Finance, the Office of the Legislative Analyst, and other officials involved with the earlier project.

2 The University of California Office of the President (UCOP) did not provide seven years of the data on instruction-related expenditures that was requested of the higher education systems by the Commission for this report. For this reason the University's columns in this display are not complete. The California State University and California Community Colleges' systemwide offices provided all of the data requested for this display; thus, their respective columns of data shown here are complete. The AICCU provided all of the instruction-related expenditures data for member independent institutions that was available to them for this report.

3 The UCOP developed estimates of the percentage of funds from each the revenue source used for general campus instructionally related activities for use in this display, excluding health sciences, organized research, and public service expenditures. The calculations of UC "I-R" data shown in this display rely upon those estimates.

4 For the California Community Colleges, FTES totals used in these calculations include only "State-Funded" FTES enrollment. The State General Funds shown here include both "Local Assistance" and "State Operations" categories. Based on instructions from the Chancellor's Office, the community colleges' "instructional expenditures" data is calculated directly from information contained in other displays in this report -- FTES enrollment information from Display 9 and system funding data from displays 9 and 18.

5 The column "State Funds + Local Funds" consists of combined State General Funds, Local Revenues, and State School Funds -- all State-determined fund sources. Current State funding formulas determine the General Fund level for the California Community Colleges, based upon the level of local property tax revenues anticipated to be available. Thus, only "revenues per full-time-equivalent student" enrollment for combined General Funds and Local Property Tax revenues are calculated in this report.

6 For the California State University, "State University Revenues" is the revenue source "Other Revenue Sources (Receipts)" minus State University Fee revenues. "Other Revenue Sources (Receipts)" includes Nonresident and application fees, contract and grant overhead, and miscellaneous revenues. In the budget and program detail contained in the Governor's Budget, this category is entitled "CSU Higher Education Fees and Income." For this publication, the entire series of CSU FTES enrollment information was updated by the CSU Chancellor's Office, Analytic Studies Division, please see the notes for Display 56 for further information on these data.

7 "Student Fees," for the purposes of this display are as follows: Community Colleges – the State Enrollment Fee, the State University – the State University Fee, and the University – the "Educational," "Registration," and "Special" (professional students) fees.

8 For the AICCU columns, the "Instruction-related Expenditures per FTE Student" data and calculations are taken from Display 49, please see the footnotes to that display for additional information on the AICCU information.

9 Some of the totals presented here will not equal the sum of amounts listed in the columns due to rounding of the cents generated by the calculations.

DISPLAY 11

1 CSU's State General Funds for 1982-83 through 1987-88 are "Net General Funds," as transmitted by the CSU Chancellor's Office. Amounts for these years were re-calculated to extract all appropriated revenues (student fees), per a change in the State's definition of CSU's State General Funds.

2 The California Maritime Academy (CMA) will officially become the 22nd campus of the California State University system (CSU) starting with fiscal year 1995-96, thus, this report no longer includes a separate display for the CMA. The Governor's 1995-96 Budget combines the CMA's budget information with the CSU's for 1993-94 actual data, 1994-95 current year estimated data, and 1995-96 budgeted data. In future years attempts will be made to combine all past-year CMA data with the historical information for the CSU to maintain consistency with the present arrangement.

3 Included here are State General Funds loaned to the community colleges in 1992-93 and 1993-94 State budgets (\$241 million and \$178 million, respectively).

4 Information shown for fiscal years 1993-94 through 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, supplemental information.

DISPLAY 12

2 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, supplemental information.

DISPLAY 13

1 The funding categories and definitions used for this display were first systematized for the 1969-70 fiscal year.

2 "SSF" consist of the University's "Educational," "Registration," and "Professional Students" fees.

3 "General University Funds" for UC consists of "Totals, General Fund Income," as is presented in Table 3 ("Income and Funds Available") of the University's State-budget detail. These funds include nonresident tuition, application and other fees, prior year fund balances, interest income on fund balances, overhead from State agency contracts, contract and grant overhead, Department of Energy overhead allowances, and other sources.

4 "University Special Funds" equal "Total, Special Funds Income," minus "subtotals, mandatory systemwide and professional fees", as presented in the University's "Income and Funds Available" information table of the State-budget.

5 "Other (Restricted) Funds" include miscellaneous funds not accounted for elsewhere in this display for various years displayed here to reconcile this chart with "Totals, Budgeted and Extramural Programs" data in UC's State-Budget detail. These monies may include "UC Retirement Program" funds used for general purpose expenditures (in 1983-84 and 1989-90), "Tobacco Products Surtax" funds, "U.S. Government" funds, bond funds used for ongoing operations, and other small fund sources. No extramural funds are included in this category.

6 When viewing this chart it is important to remember that it includes fund sources used for special ("Restricted") purposes, funds used for activities not related to general campus activities, and funding for self-supporting activities. These restricted and/or self-supporting activities include the nearly three-quarters of funds shown herein the two categories "University Special Funds and "Extramural Funds."

7 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget. Student fee revenues consist of estimates based the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, University of California, Office of the President; and supplemental information.

96, University of California, Office of the President; and supplemental information

DISPLAY 15

- 1 "State" funds include both general and special State appropriations and contracts with State agencies
- 2 "University" funds include tuition and fees and the categories "Sales and Services, Regents Reserves", and, for earlier years, "Organized Activities" in UC's Financial Scheduling.
- 3 "Federal" funds include U S government appropriations and, for earlier years, federal grants and contracts for organized research, except for the "Major Energy Research and Development Administration" (Department of Energy) laboratories
- 4 "Private" funds include gifts, contracts and grants, and endowment funds.
- 5 "Other" funds include local government contributions and other miscellaneous sources of revenue

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, University of California, Office of the President; and supplemental information

DISPLAY 16

1 The California Maritime Academy (CMA) will Officially become the California State University's (CSU) 22nd campus starting with fiscal year 1995-96, thus, this report no longer includes a separate display for the CMA. The Governor's 1995-96 Budget has combined the CMA's figures with the CSU's for 1993-94 actual data, 1994-95 current year estimated data, and 1995-96 budgeted data. In future years attempts will be made to combine all past-year CMA data with the historical information for the CSU to maintain consistency with the present arrangement.

The category "State University Revenues" ordinarily consists of systemwide resident student fees and nonresident tuition charges, overhead from foundation contracts and grants, nongovernmental college work study, independent operations, miscellaneous, unscheduled, and unallocated funds, and other revenues. To determine NET State University Revenues, Systemwide Student Fee revenues (SSF) have been extracted here and placed in a separate category

- 2 "Systemwide Student Fees" (SSF) for the CSU consists of "State University" and "Student Services" fees. Prior to the 1975-76 fiscal year, the State University's "Student Services" fee was entitled the "Maternal and Services" fee. "State University" fee was established in 1981-82, while the "Student Services" fee was abolished after 1985-86. Only estimates of "State University Revenues" were available for fiscal years 1968-69, 1969-70, 1972-73, and 1986-87
- 3 Prior to 1970-71, the "Continuing Education Revenue Fund" was entitled "Extension Program Revenue Fund"
- 4 "Capital Outlay Funds" includes COFPHE, SAFCO, and other capital outlay bond funds and special funds used for current operations
- 5 "Federal Funds" includes the Federal Trust Fund and other Federal Funds not deposited in the State treasury that are appro-

priated to the State University and not to any of its auxiliary organizations, along with various other appropriated (and some non-appropriated) federal funds

6 "Other Funds" includes all appropriations to auxiliary organization, parking and dormitory revenue funds, capital outlay funds in the operating budget, other (unclassified) funds, selected reimbursements (beginning in 1992-93), and special short-term funds sources such as the 1987 Higher Education Earthquake Account

7 Periodic changes in category titles and contents in the Governor's Budgets leaves some column amounts here non-reconcilable with budget totals

8 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act

Sources Governor's Budgets and analysis, 1970-71 through 1995-96, and the California State University Office of the Chancellor

DISPLAY 17

1 Please see the footnotes for Display 16 for descriptions of the funding categories

2 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources Governor's Budgets and analysis, 1970-71 through 1995-96, and the California State University Office of the Chancellor

DISPLAY 18

1 For fiscal years prior to 1977-78, the category "Student Fees" includes only campus-based health, parking, and auxiliary fees and nonresident tuition. Beginning in 1984-85, only revenue from the system's mandatory "State Enrollment Fee" is included in this column

2 "Other Funds" includes various combinations of funds from the Instructional Improvement, Special Deposit, Credentials, Federal Trust, COFPHE, SAFCO, and Foster Parent Training accounts, Bond Funds, (prior to 1975-76 only) other federal funds, and other funds

3 Due to the inconsistent availability of these data prior to the 1978-79 fiscal year, the information shown here has been culled from several displays and tables contained in several information sources, therefore, these data are not fully reconcilable with any one source

4 "State Enrollment Fee" revenue estimates for 1994-95 and 1995-96 are based on the 1995-96 Budget Act.

5 Included here are State General Funds loaned to the community colleges in 1992-93 and 1993-94 State budgets (\$241 million and \$178 million, respectively). These monies were to be repaid from future "Prop 98" funds to the system, however the repayment requirements have preliminarily been ruled invalid by the courts

6 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, the California Community College's Chancellor's Office, and supplemental sources

DISPLAY 19

1 Please see the footnotes in Display 18 for explanations of the categories and information

2 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, the California Community College's Chancellor's Office, and supplemental sources

DISPLAY 20

1 Please see the notes in Displays 7 through 9 and 13 through 19 for additional information on these data

2 UC's "General University Funds" include nonresident tuition, application and other fees, prior year fund balances, interest income on fund balances, overhead from State agency contracts, contract and grant overhead, Department of Energy overhead allowances, and other sources

3 SSF -- Systemwide Student Fees -- consists of Educational Fee, the Registration Fee, and the Professional Students Fee (established in 1990-91) for the University of California, the State University Fee (established in fiscal year 1981-82), and the Student Services Fee (abolished after fiscal year 1985-86) for the California State University, and the State Enrollment Fee (established in fiscal year 1984-85) the California Community Colleges

4 CSU's net "State University Revenues" include nonresident tuition charges, overhead from foundation contracts and grants, and other miscellaneous revenues. SSF are ordinarily included in this category but have been removed here -- thus, the word "Net" in the column heading -- and displayed separately in the next column

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental sources

DISPLAY 21

1 "Institution and Research" includes expenditures in general campus and health sciences instruction and departmental research

2 "Academic Support" includes expenditures in the teaching hospitals

3 "Institutional Support" includes monies for student financial aid and the operation and maintenance of physical plants

4 "Provisions for Allocation" serves as a temporary repository for lump-sum allocations and is used to account for anticipated, but as yet unallocated, funding reductions

5 The program categories "Special Regents Programs" and "Auxiliary Enterprises" are not included here, since they include only "Restricted Fund" expenditures

6 Some of the information for fiscal years 1994-95 and 1995-96 consists of estimates from background information to the 1995-96 budget, provided by the UC Office of the President

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental sources

DISPLAY 22

1 Please see notes in Display 21 for information on the program categories

2 Some of the information for fiscal years 1994-95 and 1995-96 consists of estimates from background information to the 1995-96 budget, provided by the UC Office of the President.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental sources

DISPLAY 23

1 For the CSU, "General Purpose Fund Expenditures" shown here include State General Funds and the funding source "Higher Education Fees and Income -- CSU"

2 "Institutional Support" includes expenditures for operations and maintenance of physical plants

3 "Provisions for Allocation" serves as a temporary repository for lump-sum allocations and is used to account for anticipated, but as yet unallocated, funding reductions

4 The expenditure category "Auxiliary Organizations" is not shown in this display, as there are no General Purpose Funds allocated under it

5 Actual CSU State General Fund allocations are lower than the totals shown here, CSU student fees and other income partially offset State General Fund allocations

6 Information for fiscal years 1994-95 and 1995-96 consists of estimates from background detail to the 1995-96 budget, provided by the CSU Office of the Chancellor

2 Information for fiscal years 1994-95 and 1995-96 consists of estimates from background detail to the 1995-96 budget, provided by the CSU Office of the Chancellor

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental sources

DISPLAY 25

1 Fiscal data for the three expenditure categories shown here include both "State Operations" and "Local Assistance" expenditures

2 Only estimates of "Apportionments" are available before 1971-72, prior to that time, CCC apportionments were included within public K-12 education totals

3 "Special Services and Operations" was formerly entitled "Programs and Operations" and "Extended Opportunity Programs"

4 The category "Administration" was formerly entitled "Administration and Institutional Support" and prior to that "Executive"

5 Since 1981-82, "Administration" expenses have been charged against the programs incurring the cost; for these years, administrative expenses are subtracted from "Special Services and Operations," which accounts for more than 80 percent of the charge-offs

6 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and the California Community College's Chancellor's Office

DISPLAY 26

1 UC's "Educational" Fee was initiated in 1969-70, and its "Special" fee for professional students (discussed in Displays 7) was established 1990-91 CSU's "State University" fee began in 1981-82, and its "Student Services" fee was abolished in 1985-86

2 For informational purposes, the UC's "Special" fee for selected professional students is shown here, though it does not apply to undergraduates

3 The Total Fees revenues shown here do not include revenues from systems' "Application" fees or other miscellaneous systemwide and campus-based fees

4 Funds provided for Board of Governors' financial aid grants are subtracted from the community colleges' State Enrollment Fee revenues shown here

5 Resident student fee *revenue* estimates for 1995-96 shown here are based upon resident student fee *levels* for UC, the CSU, and CCC reflect the 1995-96 Budget Act.

6 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget

Sources Governor's Budgets and analysis, 1970-71 through 1995-96, and UC, CSU, and CCC systemwide offices

DISPLAY 27

1 Revenues from "Total Student Charges" include the systemwide undergraduate resident student fee totals shown in Display 26 and the Nonresident tuition in this display They do not include "Application" fee revenues, the University's "Special" fee for selected professional students, and other miscellaneous systemwide or campus-based fees

2 Funds provided for Board of Governors' financial aid grants are subtracted from the CCC State Enrollment Fee revenues shown here

3 CCC nonresident tuition for years 1974-75 through 1980-81 are estimates The method of computing nonresident tuition was changed in 1980

4 Resident student fee revenue estimates for 1995-96 used here are part of "Total" fees are based upon resident student fee levels for UC, the CSU, and CCC reflect appropriation levels shown in the 1995-96 Budget Act.

5 Information shown for fiscal years 1994-95 and 1995-96 con-

sists of estimates from the 1995-96 Budget Act.

Sources Governor's Budgets and analysis, 1970-71 through 1995-96, and University, State University, and Community Colleges' systemwide offices

DISPLAY 28

1 "Systemwide Student Fees" (SSF) are those paid by full-time undergraduate students enrolled for two semesters or three quarters — the "Educational" and "University Registration" fees at UC, the "Student Services" and "State University" fees at the CSU, and the "State Enrollment" fee at the Community Colleges

2 UC and CSU Total Fees include all mandatory systemwide and campus-based charges (health, student union, etc.) for full-time students 1995-96 resident fee levels for UC and the CSU are those that have been adopted by the Governor in the 1995-96 budget

3 For the 1994-95 academic year, the University of California initially collected "Educational" fees at a level 18 percent higher than 1993-94 The system then rebated the part of this increase in excess of 10 percent since the UC's 1994-95 budget allocation was not reduced in mid-year under the provisions of SB 1230 — the "trigger reduction" bill

4 Please see Note 4 in Display 29 for information about the CCC State Enrollment Fee

5 CCC nonresident tuition for years 1974-75 through 1980-81 are estimates The method of computing nonresident tuition was changed in 1980 Nonresident students pay both the State enrollment fee and nonresident tuition in addition to any applicable local campus charges

6 At the State University, "Nonresident" tuition levels are determined by multiplying each system's "per-unit" charge by 30 semester units, to determine full-time student charges over an academic year The University calculates its nonresident tuition differently, based upon what constitutes a full-time student in "quarter" vs. "semester" academic calendars

7 1994-95 resident student fee levels shown here for UC, the CSU, and CCC's reflect the 1995-96 Budget Act.

8 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget and the 1995-96 Budget Act

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, University, the State University, and Community College's systemwide offices, and supplemental information

DISPLAY 29

1 All three public higher education systems in California charge "differential" fees for selected students in addition to the "Systemwide" and "Total" fees shown and used in this publication Since 1991, the University has charged a "Professional Students" fee of \$2,000 a year (2 semesters or 3 quarters) to all incoming law students, this charge was extended to business students in 1994 Beginning in 1995, entering medical and veterinary medicine students will also pay a differential fee of \$1,000 Since 1993, the University, the California State University and California Community Colleges have all charged a "duplicate degree"

tution to incoming students who already possess a bachelor's degree or higher; this tuition is roughly equal to the systems' respective nonresident tuition charges. Under current law the duplicate degree tuition is set to expire in January 1996

2 "Systemwide Student Fees" (SSF) at UC and CSU are those charged to full-time students enrolled for two academic semesters or three quarters. "Total" student fees include campus-based charges (health, student union, etc.) UC's "Special" fee for professional students is not included here, as the students it applies to (mostly law, business and medical students) are not undergraduates

3 1995-96 resident student fee levels shown here for UC, the CSU, and CCC's reflect the 1995-96 Budget. For the 1994-95 academic year, the University of California initially collected "Educational" fees at a level 18 percent higher than 1993-94. The system then rebated the part of this increase in excess of 10 percent since the UC's 1994-95 budget allocation was not reduced in mid-year under the provisions of SB 1230 – the "trigger reduction" bill

4 The CCC "State Enrollment" fee was initially established in 1984 at \$50 a semester for full-time students and \$5 per unit for part-timers, with a \$50 per semester cap. The 1992-93 Budget established two fee policy changes for the CCCs, effective January 1, 1993: (1) separate fee level of \$50 per unit, with no cap, was set for students with bachelor's degrees, (2) the regular "State Enrollment" fee level of \$6 per unit, with a \$60 per semester cap, was increased to \$10 per unit, with no cap

The 1993-94 Budget Act raised the State Enrollment Fee charge to \$13 per unit with no cap on total fees, this averages out to \$390 per year for full-time students (2 semesters, @ at 15 units per). The State Enrollment Fee was not increased in both the 1994-95 and 1995-96 budget act. The separate fee level of \$50 per unit for students with bachelor's degrees established by the 1992-93 Budget Act sunsets on January 1, 1996

DISPLAY 30

1 Please see the notes in Displays 7-9 and 26-28 for information about these data.

2 For all past years through 1993-94, index values were calculated to measure annual changes in California Personal Income based upon consultation with representatives of the former State Commission on State Finance (C O S F), as were determinations of index values for the California Consumer Price Index (CCPI). In 1995, the California Department of Finance provided updates to the full series of price inflation indices used in this publication

3 Only projections of percent changes in the U.S. CPI, the CCPI, and California Personal Income are available for fiscal year 1995-96

Sources: Governor's Budgets, 1967-68 through 1995-96, Commission on State Finance, University, the State University, and the Community College's systemwide offices

DISPLAY 31

1 Please see notes in earlier displays for information on "SSF" and "Total" student fees and Displays 57 and 58 for data on price

indices, and constant dollar calculations. All student fees totals shown here are those charged on an annual basis, as they were approved in the 1995-96 Budget Act

2 Fiscal year 1995-96 (FY 96) "constant dollar" amounts are calculated by dividing the California CPI value for FY 96 by the CCPI index value for each year, then multiplying the result – the inflation factor – by the appropriate year's number to be converted, in this case student fee levels. For example, to get UC Total Fees for 1965-66 in FY 96 constant dollars [\$1,206] divide the FY 96 CCPI index value [156.0] by the FY 66 CCPI index value [31.7], this yields an inflation factor of [4.92114] for 1965-66, this factor is multiplied by the actual FY 66 UC Total Fee [\$245] to arrive at \$1,206

1 COFPHE = Capital Outlay Fund for Public Higher Education

2 State General Funds for capital outlay in the State University are shown in the "COFPHE" category for years prior to 1969-70

3 "General Obligation State Bonds" includes the series of higher education capital outlay bond issues approved by the voters since 1986 and other State "G O" bonds

4 "Other State Bonds and Special Funds" includes revenue bonds, the Public Buildings Construction Fund, and other funds

5 State funds listed in all but the most recent fiscal year reflect expenditures of all funds released to the CSU or committed prior to the end of the fiscal year. Because capital funds are available for expenditure on a multi-year basis, some of the data from the Governor's Budget may not correspond to actual expenditures

6 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates and proposed appropriations in the 1995-96 Governor's Budget

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information

DISPLAY 53

1 In 1991-92, community college ADA enrollment was converted to FTES, and is now shown as is enrollment in UC and CSU. Part of the conversion from ADA to FTES enrollment was a policy change which affected the formula used to calculate community college's funded enrollment. This change produced a one-time increase in FTES of approximately 12 percent in the 1991-92 fiscal year.

2 Included here – and in all of the enrollment displays showing the community colleges funded student enrollment – are credit and non-credit FTES funded by State and local appropriations, as provided by the Chancellor's Office. Excluded here are federally and other-funded community college FTES.

3 The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst and other available information. Only estimates of University and State University headcount and FTES enrollments were available for the 1973-74 and 1974-75 fiscal years.

4 The State University headcount totals include enrollment in the system's International Program, enrollments in the CSU Statewide Nursing Program are estimated for 1988-89 and enrollment in the International Program are estimated for 1965-66 and 1966-67. Summer quarter enrollments are included from the beginning of year-round operations in 1965-66, summer quarter enrollments by level are estimated for 1965-66. FTES and headcount enrollment for the California Maritime Academy – now part of the CSU system – are included here as of the 1993-94 fiscal year.

5 UC and CSU FTES and headcount enrollments for fiscal years 1993-94 through 1995-96 are estimates provided by systemwide offices and the Department of Finance. For this publication, the entire series of CSU FTES enrollment information was updated by the CSU Chancellor's Office, Analytic Studies Division, please see the notes for Display 56 for further information on these data.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information.

DISPLAY 54

1 The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst, and other available information. Please see the footnotes in Displays 7-9, and particularly Display 53, for information about these enrollment numbers.

2 Information shown for fiscal years 1993-94 through 1995-96 consists of estimates from the segments' systemwide offices and the Department of Finance.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information.

DISPLAY 55

1 The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst, and other available information. For the three earliest fiscal years, 1970-71 through 1972-73, "Total Enrollment" includes students in the Extended University Program, information is not available to show this as a separate category.

2 "Postbaccalaureate" students are included here within the "Graduate" students column in this display.

3 The enrollment information shown here was provided by the University of California Office of the President. Information for fiscal years 1994-95 and 1995-96 is based on the 1995-96 Budget Act.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, the UC systemwide office, and supplemental information.

DISPLAY 56

1 Information on estimates of "unfunded" FTES enrollment in the California Community College was provided by the California Community College's Chancellor's Office. The Chancellor's Office of the California Community Colleges updated the community colleges' entire data series of FTE enrollment information for this publication.

2 For this publication, the entire series of CSU FTES enrollment information was updated by the CSU Chancellor's Office, Analytic Studies Division. The State University FTES totals include enrollment in the system's International Program. "By-level" enrollments in the CSU Statewide Nursing Program are estimated for 1988-89, by-level enrollment in the International Program are estimated from 1965 through 1967. Summer quarter enrollments are included from the beginning of year-round operations in 1965-66, summer quarter enrollments by level are estimated for 1965-66. "Postbaccalaureate" FTES enrollments are included within "Graduate" enrollment information for years prior to 1974-75.

3 FTES enrollment for the California Maritime Academy – now part of the CSU system – are included here as of the 1993-94 fiscal year.

Sources The CSU 1990 and 1994 Statistical Abstract and the CSU Office of the Chancellor, the CCC Chancellor's Office Analytic Studies Division, and supplementary sources.

DISPLAY 57

1 The 1995-96 constant-dollar inflation factors shown here are calculated by dividing each price indices' "index value" for 1995-96 by that indices' index value for each fiscal year. The resulting numbers – each year's inflation factor – are then multiplied by the

dollar amount being measured (revenue sources, student fees, expenditure categories, etc.) for that same fiscal year to produce the number which is that dollar amount expressed in 1995-96 constant dollars (please see the example provided in the note 2 for Display 31)

2 Please see the "Definitions" section of this report for a full description of the United States Consumer Price Index. The United States Bureau of Labor Statistics "Consumer Price Index for All Urban Consumers," or CPI, is a measure of the average change in prices over time in a fixed market basket of goods and services purchased by U.S. residents. The U.S. CPI is measured from the federal 1983 federal fiscal year. The U.S. CPI values reported here are on a July 1 through June 30 fiscal year and are based on 12-month averages. This entire series of data was revised from information provided by the California Department of Finance.

3 Please see the "Definitions" section of this report for a full description of the California Consumer Price Index. The highlighted "California Consumer Price Index" (CCPI) inflation factors are those used for the 1995-96 constant dollar calculations presented in other displays in this report. The California CPI and California Personal Income are based on the State fiscal year; the State CPI is measured from the State 1983 fiscal year. Index values for California Personal Income were initially calculated from percent change data and were done in consultation with the Commission on State Finance and the U.S. Bureau of Labor Statistics. This entire series of data was revised this year from information provided by the California Department of Finance.

4 Please see the "Definitions" section of this report for a full description of the "Higher Education" and "Research and Development" price indices. The HEPI and R&D price indices are shown in federal-fiscal year 1983 dollars, only estimates of these indices for 1994-95 and 1995-96 are available for this report.

5 Information shown for all the price indices and personal income for fiscal years 1994-95 and 1995-96 are estimates.

Sources: Bureau of Labor Statistics, U.S. Department of Labor; Research Associates of Washington, and California Commission on State Finance, California Department of Finance, Legislative Analyst's Office.

DISPLAY 58

1 Please see the footnotes in Display 57 for information about these data.

2 Information shown for all the price indices and personal income for fiscal years 1994-95 and 1995-96 are estimates.

Sources: Bureau of Labor Statistics, U.S. Department of Labor; Research Associates of Washington, and California Commission on State Finance, California Department of Finance, Legislative Analyst's Office.

DISPLAY 59

1 Please see Displays 12, 29 - 31, and 57 for explanations of the data in this display; percent changes in "Total" State General Funds is taken from the calculations in Display 78, which are based on data in Display 1-3.

2 CPEC = California Postsecondary Education Commission.

3 No party adjustments were calculated for UC and CSU for fiscal year 1965-66; no party adjustment was computed for CSU for 1985-86.

4 UC's 1992-93 budgeted faculty salary adjustment includes monies for both 1991-92 and 1992-93 merit salary adjustments. CSU funded its 1991-92 merit step increases from existing resources, and anticipated doing the same for 1992-93, due to collective bargaining contractual obligations. UC's 1994-95 "Budgeted Faculty Salary Adjustment" assumes full restoration of the 3.5 percent reduction in salaries instituted in 1993-94.

5 Information for 1995-96 consists of estimates from the 1995-96 State University and University systemwide offices.

Sources: Bureau of Labor Statistics, U.S. Department of Labor; Research Associates of Washington, Commission on State Finance; Legislative Analyst's Office, Governor's budgets and analysis, Coordinating Council for Higher Education, California Postsecondary Education Commission, and other information.

DISPLAY 60

1 "State-Determined Funds" as defined here include only those fund sources used for the general, non-restricted educational missions of the three public higher education systems over which they and/or the State (through the Legislature and Governor) have policy and allocation authority.

2 SGF = State General Funds, "GUF" = General University Funds (for the UC); SUF = State University Funds (for the CSU); SSF = Systemwide Student Fee revenues, St/Lc'l = State General + Local Funds (for the CCCs); and St Sch F = the State School Fund.

3 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information.

DISPLAY 61

1 Please see the notes in Displays 7, 13, 31, 57, and 60 — particularly Display 57 — for additional information on these numbers and calculations.

2 The revenue sources shown here — State-Determined Funds — are those over which the State or the University exercise direct control or policy-setting responsibility.

3 1995-96 "constant-dollar" amounts are calculated by multiplying the appropriate-year's CCPI inflation factor by the "actual" dollar amount for the fund sources shown above for each year. Please see notes for displays 31 and 57 for information on the calculations used to determine constant dollar amounts.

4 Systemwide Student Fees (SSF) consists of UC's Education Fee, the Registration Fee, the Professional Students Fee.

5 "GUF" includes nonresident tuition, application and other fees, prior year fund balances, interest income on fund balances, overhead from State agency contracts, contract and grant overhead, Department of Energy overhead allowances, and other miscellaneous fund sources. Included in UC's 1991-92 GUF total is \$54.7 million that was appropriated in the 1990-91 year but not avail-

able until the next fiscal year

6 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information

DISPLAY 62

1 Please see the data and notes in Displays 8, 16, 31, 57, and, specifically, Display 61, for additional information on these numbers and calculations. The dollars per FTES numbers shown here are based upon calculations from the revenue sources presented and explained in Display 60

2 The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst, and other available information

3 1995-96 constant-dollar amounts are calculated by multiplying the appropriate-year's CCPI inflation factor by the "actual" dollar amount for the fund sources shown above for each year. Please see Displays 31 and 57 for information on the calculations used to determine constant-dollar amounts

DISPLAY 67

1 Beginning with the 1995-96 fiscal year, the California Maritime Academy becomes a campus within the California State Uni-

versity system. Since the Maritime Academy is now part of the State University system, and its budget data is thus included within information displayed for the State University, this publication will no longer show individual information for the California Maritime Academy.

2 "Hastings Funds" include student fee revenues, nonresident tuition, miscellaneous fees, scholarly publications income, overhead from federal contracts, prior year fund balances, and other sources.

3 For fiscal years prior to 1987-88, "Extramural, Other Funds" includes only federal funds. Beginning in 1987-88, this category includes all current funds to be consistent with the University of California's budget detail; this change results in a one-time increase in these funds for the 1987-88 fiscal year. These sources include private gifts, contracts and grants, investment income, auxiliary enterprise income, and other miscellaneous funds.

4 Hastings College officials report that in fiscal year 1989-90 an extraordinary amount of Extramural Funds were expended to repair damage to the campus caused by the Loma Prieta earthquake. This accounts for the large increase in spending in the category "Extramural, Other Funds" for that year.

5 Information shown for fiscal years 1994-95 and 1995-96 is taken from the 1995-96 Governor's Budget, as amended by the 1995-96 Budget Act.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, Hastings College of the Law, and supplemental information.

DISPLAY 68

1 Only fiscal data for public K-12 education is included here; all other education agencies accounted for in the "education" section of the State Budget are excluded here. For years prior to 1984-85, several sources are used; thus, fund totals shown for earlier years may not reconcile with budget-document totals or any one data source.

2 "Other State Aid" includes special funds — such as the Tobacco Tax and Lottery Funds — the State School funds, payments to the STRS Fund, selected capital outlay funds used for operations, and other funds. The large increase in these funds for 1985-86 is due to the advent of the "Lottery Education Fund" program, which provided more than a half-billion dollars to K-12 education in that year.

3 "Local Tax Revenues" includes local debt service taxes, excess property taxes, State property tax subventions, and other miscellaneous local revenues. Last year, these data were revised for past years to account for additional local revenues not included in past versions of this report. This information, shown in the 1995-96 Governor's Budget (Table K12-1, page 133), includes local funding that is NOT part of the Proposition 98 funding formula; thus these totals will not reconcile with other K-12 financing displays that describe Prop 98 funding.

4 "Federal Aid" includes the Federal Trust Fund, SLIAG immigrant education monies, and other federal funds, excluding grants. These data have been revised for past years, based upon updated information.

5 "Other Funds" federal grants not included as "Federal Aid", county income, reimbursements, and other miscellaneous fund

sources for various years.

6 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources: Governor's Budgets and analysis, 1967-68 through 1995-96, Department of Education, and supplemental information.

DISPLAY 69

1 The category "High School" includes annual average daily attendance (ADA) from nonpublic school Special Education and other special programs.

2 For fiscal years 1967-68 through 1970-71, the ADA for all education of adults that is conducted in other program was included in the "Adult Education" category.

3 ROC / P = Regional Occupational Centers / Programs.

4 Only estimates of average daily attendance were available for the 1970-71 fiscal year.

5 "TOTAL" include Supplemental Summer School average daily attendance.

6 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

DISPLAY 74

1 Per-Capita Appropriations are calculated by dividing the community colleges' appropriations data by California's population. The result is an average amount of State and local tax and "combined" State/local and systemwide student fee revenues appropriated to the community colleges for each person living in the State.

2 "State Approp's and Local Funds" includes State General Funds and Lottery Funds appropriated to the CCCs.

3 To maintain consistency with the per-capita information shown for the University and State University shown in Displays 72 and 73, revenues from the "State Enrollment Fee" initiated in the 1984-85 fiscal year are included for the community colleges.

3 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources Governor's Budgets and analysis 1967-68 through 1995-96, and supplemental information

DISPLAY 75

1 Please see the footnotes in Displays 71 through 74 for information on these numbers.

2 For K-12 Schools and the California Community Colleges, appropriations include State and Local revenues, including State Aid for K-12.

3 For the California State University and University of California, appropriations include State General Fund revenues and systemwide resident student fee revenues.

4 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information

DISPLAY 76

1 "Caseload" expenditures for the State of California are calculated by dividing the combined total of State General Funds, Local Property Tax Revenues, and Nongovernmental Cost Funds (see Displays 1 and 4) by the State population (see Display 71). These particular fund sources are used here because they are general, in use, and are not dedicated to specific purposes, as is the case with "Special Funds" and "Federal Funds."

2 "Caseload" expenditures for the California Public Higher Education are calculated by dividing the public systems' respective "State Appropriations" funds (see Displays 72-74) by their total headcount enrollment (see Display 79). The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst, and other available information.

3 "Caseload" expenditures for the California Public K-12 Education are calculated by dividing K-12 total State and Local appropriations (see Displays 68 and 70) by the K-12 headcount enrollment (see Display 79).

2 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, Department of Education, systemwide offices, and supplemental information

DISPLAY 77

1 Headcount enrollment information was provided by the education systems. The University of California Office of the President did not provide estimates of budgeted headcount and FTES enrollment for 1995-96 for this publication. 1995-96 University enrollment information shown in this report are projections derived from information provided by the Department of Finance, Legislative Analyst, and other available information.

2 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, Department of Education, systemwide offices, and supplemental information

DISPLAY 78

1 Please see the footnotes in Displays 53 through 56 and 77 for explanations of these numbers

2 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources. Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information

DISPLAY 79

1 Please see the footnotes in Displays 1-3, 11,12, 53, and 71-77 for explanations and definitions of these appropriations and enrollment numbers

2 Total State General Funds is from Display 1 and earlier State budgets, State General Funds and Local Appropriations to Higher Education are from Display 11

3 Local Revenues, primarily property taxes, for the California Community Colleges are included in these fund-total calculations because funding formulas base General Fund allotments to the system, in part, on local revenues apportioned to the community colleges

4 Information shown for fiscal years 1994-95 and 1995-96 consists of estimates from the 1995-96 Governor's Budget.

Sources Governor's Budgets and analysis, 1967-68 through 1995-96, and supplemental information

DISPLAY 80

1 The states shown here are those with the largest population as of the 1990 census and are arranged in terms of population

2 Per-capita expenditures are defined here as state government expenditures of selected federal, state, and local revenues averaged over the population of the state

3 Included in Displays 80 through 84 are State-appropriated funds for student aid and for governing and coordinating boards. State funds appropriated to other state agencies for ultimate allocation to universities to fund their current operations are included here; capital outlay funds are excluded. Please note that expenditures of Federal funds are included in displays 80 through 82

4 When viewing these data it is important to remember that, in addition to State-appropriated monies, States rely upon several other revenue sources to fund their higher education systems. Chief among these other sources are student tuition and fee charges

5 The Census Bureau reports that the state of Pennsylvania reclassified three postsecondary institutions (Temple University, the University of Pittsburgh, and Lincoln University) from "private" to "public" in 1991. Public fund expenditures for these three institutions (as are defined by the Bureau) first impacts the calculation of per-capita spending for the state in the 1991-92 data reported here. This event accounts for the near doubling of Pennsylvania's per-capita spending information shown in Displays 80 and 82

6 Only estimates were available for fiscal years 1968-69 and 1972-73

among these other sources are student tuition and fee charges

3 Percent changes for 1984-85 and for 11-years were calculated using State appropriations data for 1982-83 through 1984-85, published in past editions, that are not shown in this display

4 The information presented for fiscal years 1993-94 and 1994-95 consists of the most recent estimates available

Sources "GRAPEVINE," Illinois State University, and the Chronicle of Higher Education

DISPLAY 85

1 The term "Megastate" (coined by Neal Peirce) refers to States with annual higher education General Fund appropriations of \$1 billion or more. This display includes States appropriating \$1 billion or more in at least one year between 1989-90 and 1994-95, the state of Washington is included due to its relatively large higher education appropriations and its regional proximity to California.

2 Only appropriations of State General Funds for the ongoing operations of higher education are included in this display. It is important to remember that states support higher education with a variety of fund sources not shown here, including local tax revenues (for community colleges), student tuition and fee charges, and federal funds.

3 Combined State-fund appropriations for the University of California and the California State University are shown as a separate entity -- "UC/CSU" -- here from the state of California, in addition to being included in the California fund totals shown. Funding for "UC/CSU" is not counted as a separate entity in the "totals" calculations for appropriations, nor is funding for this entity included in any of the percent changes calculated in the display.

4 The five year percent change information includes data for 1989-90, which was published last year but is not included in this year's report.

5 The information here for fiscal years 1993-94 and 1994-95 consists of the most recent estimates available on higher education finance from state and national sources.

Sources "GRAPEVINE," Illinois State University, "State Higher Education Appropriations 1994-95," SHEEO, and The Chronicle of Higher Education.

DISPLAY 86

1 Only appropriations of State tax funds (commonly referred to as "State General Funds") are included in this display.

2 Complete names of University of California comparison institutions: U Illinois -- the University of Illinois, Urbana/Champaign, U Michigan -- University of Michigan, Ann Arbor, St U of NY -- State University of New York, Buffalo, U Virginia -- University of Virginia.

3 UC's four private faculty salary comparison institutions -- the Massachusetts Institute of Technology, Harvard University, Stan-

ford University, and Yale University -- are not shown here, as no state appropriations data were available for them.

4 Complete names of the California State University comparison institutions: Arizona SU -- Arizona State University, Cleveland SU -- Cleveland State University (in Ohio), G Mason -- George Mason University (in Virginia), Georgia SU -- Georgia State University, Illinois SU -- Illinois State University, NC State U -- North Carolina State University, Raleigh, Rutgers -- Rutgers The State University of New Jersey, Newark, SUNY, Albany -- the State University of New York, Albany, U Colorado -- University of Colorado, Denver, U Connecticut -- University of Connecticut, U Maryland -- University of Maryland, Baltimore County, U Nevada -- University of Nevada, Reno, U Texas -- University of Texas, Arlington, U Wisconsin -- University of Wisconsin, Milwaukee, Wayne SU -- Wayne State University (in Michigan).

5 CSU's five private faculty salary comparison institutions -- Bucknell University, Loyola University of Chicago, Reed College, Tufts University, and the University of Southern California -- are not shown here, as no state appropriations data were available for them.

6 No campus-specific appropriations data were available for the faculty salary comparison institutions within the Rutgers University and University of Colorado systems.

7 Information shown for fiscal years 1993-94 and 1994-95 consist of computations based upon the most recent revenue estimates available from national sources.

Sources "GRAPEVINE," Illinois State University, "State Higher Education Appropriations" for selected years, State Higher Education Executive Officers (SHEEO), The Chronicle of Higher Education, and, the California Postsecondary Education Commission.

DISPLAY 87

1 Please refer to notes for Display 57, and to the "Definitions" section of the report, for information on the CPI and HEPI.

2 Due to rounding, the numerical information on General Fund appropriations presented here may be slightly different than the U.S. Totals data shown in Display 83.

3 The index value for HEPI for fiscal year 1994-95 is an estimate; thus the percentage changes calculated for this year is also an estimate.

4 This entire data series has been revised, updated and expanded from that published in previous versions of this report, based upon corrections for past years by the source of these data.

5 The information for the 1993-94 and 1994-95 fiscal years consists of the most recent estimates available, as reported to "GRAPEVINE."

Sources "GRAPEVINE," Illinois State University, The Chronicle of Higher Education, Research Associates of Washington, and the California Postsecondary Education Commission.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

THE California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature

Members of the Commission

The Commission consists of 17 members. Nine represent the general public, with three each appointed for six-year terms by the Governor, the Senate Rules Committee, and the Speaker of the Assembly. Six others represent the major segments of postsecondary education in California. Two student members are appointed by the Governor.

As of June 1995, the Commissioners representing the general public are

Henry Der, San Francisco, *Chair*
Guillermo Rodriguez, Jr., San Francisco, *Vice Chair*
Elaine Alquist, Santa Clara
Mim Andelson, Los Angeles
C. Thomas Dean, Long Beach
Jeffrey I. Marston, San Diego
Melinda G. Wilson, Torrance
Linda J. Wong, Los Angeles
Ellen F. Wright, Saratoga

Representatives of the segments are

Roy T. Brophy, Fair Oaks, appointed by the Regents of the University of California,
Yvonne W. Larsen, San Diego, appointed by the California State Board of Education,
Alice Petrossian, Glendale, appointed by the Board of Governors of the California Community Colleges,
Ted J. Saenger, San Francisco, appointed by the Trustees of the California State University,
Kuhl Smeby, Pasadena, appointed by the Governor to represent California's independent colleges and universities, and
Frank R. Martinez, San Luis Obispo, appointed by the Council for Private Postsecondary and Vocational Education

The two student representatives are
Stephen Leshner, Meadow Vista
Beverly A. Sandeen, Costa Mesa

Functions of the Commission

The Commission is charged by the Legislature and Governor to "assure the effective utilization of public postsecondary education resources, thereby eliminating waste and unnecessary duplication, and to promote diversity, innovation, and responsiveness to student and societal needs."

To this end, the Commission conducts independent reviews of matters affecting the 2,600 institutions of postsecondary education in California, including community colleges, four-year colleges, universities, and professional and occupational schools.

As an advisory body to the Legislature and Governor, the Commission does not govern or administer any institutions, nor does it approve, authorize, or accredit any of them. Instead, it performs its specific duties of planning, evaluation, and coordination by cooperating with other State agencies and non-governmental groups that perform those other governing, administrative, and assessment functions.

Operation of the Commission

The Commission holds regular meetings throughout the year at which it debates and takes action on staff studies and takes positions on proposed legislation affecting education beyond the high school in California. By law, its meetings are open to the public. Requests to speak at a meeting may be made by writing the Commission in advance or by submitting a request before the start of the meeting.

The Commission's day-to-day work is carried out by its staff in Sacramento, under the guidance of its executive director, Warren Halsey Fox, Ph.D., who is appointed by the Commission.

Further information about the Commission and its publications may be obtained from the Commission offices at 1303 J Street, Suite 500, Sacramento, California 95814-2938, telephone (916) 445-7933.
